

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Analizna kemija I
Course title:	Analytical Chemistry I

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Izobraževalna kemija / 1. stopnja UN Educational Chemistry / 1 st level UN		1.	zimski Autumn

Vrsta predmeta / Course type:	Obvezni / Obligatory
-------------------------------	----------------------

Univerzitetna koda predmeta / University course code:	
---	--

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Laboratory work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
30			30		60	4

Nosilec predmeta / Lecturer:	Mladen Franko
------------------------------	---------------

Jeziki / Languages:	Predavanja / Lectures: slovenski / Slovene
	Vaje / Tutorial: slovenski / Slovene

**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

Osnovno znanje klasične analizne kemije,
matematike in fizike

Basic knowledge of classical analytical chemistry,
mathematics and physics

Content (Syllabus outline):

<u>Predavanja</u> <u>-Statistično ovrednotenje analiznih rezultatov</u> , napake v analizni kemiji, natančnost, točnost, merilna negotovost <u>-Elektrokemijske metode</u> Potenciometrija (ionoselektivne elektrode) - elektrode s stekleno membrano, elektrode s kristalinično homogeno in heterogeno membrano, elektrode s tekočinsko membrano, Voltametrija - direktna in pulzna polarografija, stripping analiza, ciklična voltametrija, amperometrične titracije Konduktometrija Elektrogravimetrija in kulometrija - elektroliza pri konstantni napetosti in pri konstantnem toku, elektroliza pri kontroliranem potencialu, potencijalna kulometrija, kulometrične titracije	<u>Lectures</u> <u>-Statistical evaluation of analytical results</u> , errors in analytical chemistry, precision, accuracy, measurement uncertainty <u>-Electrochemical methods</u> Potentiometry, ion-selective electrodes, glass electrodes, solid state crystalline homogeneous and heterogeneous membrane electrodes, liquid membrane electrodes Voltammetry Direct and pulse polarography, stripping analysis, cyclic voltammetry, amperometric titrations, Conductometry Electrogravimetry and coulometry Constant cathode potential gravimetry, constant current gravimetry, potentiostatic coulometry, coulometric titrations <u>-Spectroscopic methods</u>

Temeljni literatura in viri / Readings:

- Douglas A. Skoog, F. James Holler, Stanley R. Crouch, "Principles of Instrumental Analysis, 6. izdaja, 2006.
- D. A. Skoog, F.J.Holler, T. A. Nieman: *Principles of Instrumental Analysis*, Saunders College Publishing, 5. izdaja, New York 1998.

Cilji in kompetence:

Predmet daje poglobljeno znanje teoretskih osnov in aplikacij analiznih metod elektrokemijske analize, spektroskopske analize in separacijskih metod

Podatki o sestavi materialov vodijo vsak proizvodni proces v raznih fazah od surovin do končnih produktov. Analiza je osnova za vrednotenje hrane, okolja, delovanja organizmov. Predmet analizna kemija 2 obravnava zato področje kemijske analize teoretično poglobljeno, praktično pa tako usmerjeno, da usposobi slušatelje ne samo za razumevanje, temveč tudi za reševanje analiznih problemov. Predmet daje integralni pregled teorij in metod uporabnih za identifikacijo in rešitev vrste realnih problemov kemijske analize.

Primeri iz področij anorganske kemije, organske kemije in biokemije se uporabljajo za razumevanje kemijskih in fizikalnih procesov, ki spremljajo analizni postopek.

Objectives and competences:

Subject gives the complete overview of knowledge concerning the theoretical basis and applications of analytical methods in electrochemical, spectroscopic and separation methods.

Data from the content of materials lead every production process in different phases from raw materials to final products. Analysis is the basis for quality evaluation of food, environment and living organisms. The analytical chemistry gives the complete theoretical overview and during practical work gives the knowledge not only for understanding but also for solving analytical problems. The subject gives the integral overview of theories and methods used for identification and quantitative determination of real problems of chemical analysis.

Examples from inorganic chemistry, organic chemistry and biochemistry are used for understanding of chemical and physical processes which accompany analytical procedure.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- razumeti osnove kemijske analize, osnovnih instrumentalnih analiznih meritev.
- spoznati osnovne principe in zakone na katerih temeljijo instrumentalne analizne metode
- spoznati kvantitativno ovrednotenje rezultatov meritev

Intended learning outcomes:

Knowledge and Understanding:

On completion of this course the student will be able to

- understand the base of chemical analysis and basic instrumental analytical measurements
- recognize basic principles and laws on which instrumental analytical methods are based.
- recognize quantitative evaluation of

<p>Prenesljive/ključne spretnosti in drugi atributi: Ročne spretnosti, predvsem zmožnost praktičnega dela na instrumentih. Ovrednotenje rezultatov meritev in merilne negotovosti.</p>	<p>measurements results.</p>
<p>Transferable/Key Skills and other attributes: Manual skills, preferable the capability of practical work with instruments. Evaluation of analytical results and measurement uncertainty.</p>	

Metode poučevanja in učenja:

- Predavanja
- Laboratorijske vaje

Learning and teaching methods:

- Lectures
- Lab work

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

<p>Pristopni pogoji za opravljanje vaj: opravljene vaje iz Analizne kemije I in zaključni kolokvij</p> <p>Pristopni pogoji za opravljanje izpita: Izpit iz Analizne kemije I Opravljene lab. vaje in test iz vaj Analizna kemija II. Izpit je opravljen, če so pozitvno opravljene vse naslednje obveznosti:</p> <p><u>Ocenjevanje predmeta</u></p> <ul style="list-style-type: none"> • Računske naloge • Ustni izpit <p><u>Ocenjevanje lab. vaj</u></p> <ul style="list-style-type: none"> • Pisni kolokvij po zaključenih laboratorijskih vajah 	<p>30</p> <p>40</p> <p>30</p>	<p><u>Conditions to access the laboratory work:</u> Concluded lab work of Analytical chemistry I and final written test</p> <p><u>Conditions to access the examination:</u> Analytical Chemistry I Concluded lab. Work and written test of lab. Work in Analytical Chemistry II Student has to pass successfully the following obligations:</p> <p><u>Assesment of the subject</u></p> <ul style="list-style-type: none"> • Course work, analytical calculations • Oral examination <p><u>Assesment of lab work</u></p> <ul style="list-style-type: none"> • Written colloquium after conclusion of lab work
