Nosilec predmeta / Lecturer:

Dušan Pagon

Jeziki / Predavanja / Lecture: slovenski / Slovenian
Languages: Vaje / Tutorial: slovenski / Slovenian

Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:
Prerequisites:

Linearna algebra, Algebra, Analiza 2

Linear algebra, Algebra, Analysis 2

Vsebina:

Contents (Syllabus outline):

- Metričen prostor, različne vrste podprostорov, prostor fraktalov.
- Afine transformacije, skrčitve, sistemi iterirajočih funkcij.
- Osnove dinamičnih sistemov, dinamika fraktalnih množic.
- Teoretično in eksperimentalno določanje dimenzije fraktala, Hausdorff-Bezikovičeva dimenzija.
- Juliajeve množice, primeri njihove uporabe.

- A metric space, different types of subspaces, the space of fractals.
- Affine transformations, contraction mappings, systems of iterating functions.
- Introduction to dynamical systems, dynamics on fractal sets.
- The theoretical and experimental determination of the fractal dimension, Hausdorff-Besicovitch dimension.
- Julia sets, examples of their application.

Temeljni študijski viri / Textbooks:

Barnsley, M. F.: Fractals Everywhere. Academic Press, Boston (1988); Second edition (1993)

Barnsley, M. F.: Superfractals. Cambridge University Press, Cambridge (2006)

Devaney, Robert: An Introduction To Chaotic Dynamical Systems, 2nd ed., Westview Press (2003)

Devaney, R. L.: Chaos, Fractals and Dynamics - Computer Experiments in Dynamics, Addison-Wesley (1990)

Edgar, G: Classics on Fractals. Westview Press, Boulder (1992)

Falconer, K. J.: The Geometry of Fractal Sets. Cambridge University Press, Cambridge (1985)

Lapidus, M. L., Frankenjuijsen, M. v.: Fractal Geometry, Complex Dimensions and Zeta Functions. Springer, New York (2006)

Edgar, Gerald: Measure, Topology, and Fractal Geometry, 2nd ed., Springer, New York (2008)

Cilji:

- Študenti se seznanijo s strukturo podprostora fraktalov v metričnem prostoru in z osnovnimi načini generiranja fraktalov (družine iterirajočih preslikav). Spoznajo tudi različne pristope k določanju dimenzijske frakta ter dinamiko fraktalnih množic.

Objectives:

- Students get familiar with the structure of the subset of fractals in a metric space and with the main ways of generating fractals (iterated functions systems). They also study different approaches to the fractal dimension and the dynamics of fractal sets.

Predvideni študijski rezultati:

Znanje in razumevanje:

- aktivno obvladanje strukture metričnega prostora in prepoznavanje fraktalnih podmnožic
- teoretično in eksperimentalno določanje dimenzijske frakta
- analiza dinamičnih sistemov in njihova uporaba

Prenesljive/ključne spretnosti in drugi atributi:

- sposobnost generiranja fraktalov
- izračun dimenzijske frakta
- modeliranje z dinamičnimi sistemi

Metode poučevanja in učenja:

- Predavanja
- Laboratorijske vaje
- Individualno delo

Intended learning outcomes:

Knowledge and Understanding:

- active knowledge of metric space structure and the ability to recognize its fractal subsets
- theoretical and experimental ways for finding the dimension of a fractal
- the analysis of dynamical systems and their application

Transferable/Key Skills and other attributes:

- the ability to generate fractals
- the calculation of fractal dimension
- modeling with dynamical systems

Learning and teaching methods:

- Lectures
- Laboratory excercises
- Individual work

Načini ocenjevanja:Delenj (v %) /
Weight (in %)**Assessment:**

- pisni in ustni izpit

60 / 40

- written and oral exam

Materialni pogoji za izvedbo predmeta :

- Predavalnica
- Laboratorij

Material conditions for subject realization

- Lecture hall
- Laboratory

Obveznosti študentov:

(pisni, ustni izpit, naloge, projekti)

- pisni in ustni izpit, seminarska naloga

Students' commitments:

(written, oral examination, coursework, projects):

- written and oral exam, coursework
