**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

Poznavanje zoologije in biodiverzitete na ravni univerzitetnega programa

Knowledge of zoology and biodiversity at graduate level

Vsebina:

Obravnavana so izbrana poglavja iz naslednjih sklopov.

Uvod v izbrana poglavja iz zootaksonomije obsega podrobnejše seznanjanje s konceptom taksonov, zlasti vrste, v zoologiji. Poudarek je na obravnavi biotske vrste. Pojasnjeni so normativi za opis novih taksonov, kriteriji za objavo novih taksonov in njihovo veljavnost. Sledi obravnavi meril za pripravo slikovnega gradiva (shem, znanstvenih risb, fotografij, elektronskomikroskopskih mikrografij), primernega za objavo, ter obravnavi primernih tekstovnih opisov taksonov po normativih IZN. Dodatno so obravnavani vsebinsko, terminološko in jezikovno primerni opisi taksonov. Študentje vežbajo ustrezni opis taksona na izbranem primeru.

Contents (Syllabus outline):

Selected topics in the following chapters are discussed.

The introduction into selected chapters in zoological taxonomy comprehends knowledge about the taxa concept, stressing the concept of biospecies. The norms and rules of describing new taxa, and the criteria for the validity of published taxa are discussed. The discussion focusing on suitable illustrations (schemes, scientific drawings, photographies, electron microographies), and an appropriate textual descriptions according to the rules of the IZN follows. Additionally, the appropriate context, terminology and language are presented. An appropriate description of a taxon is trained on a selected case study.

Temeljni študijski viri / Textbooks:

- Council Biol. Editors, 2002: Scientific style and format. Council Biol. Editors, Chicago.
- International Commision of Zoological Nomenclature, 1999: Nomenclature: International code of zoologicla nomenclature. Tipografia La Garangola, Padova.
- International Commision of Zoological Nomenclature, 2006: Standards, Sense and Stability for Animal Names in Science. <http://www.iczn.org/>
- Kluge N., 2006: Principles of Nomenclature of Zoological taxa. - <http://www.bio.pu.ru/win/entomol/KLUGE/zoo-name.htm>
- Izbrani članki iz revij/selected articles from: Cladistics, Molecular Phylogenetics and Evolution itd./etc.

Cilji:

- Študenti se podrobno seznanijo s konceptom taksonov, zlasti biotske vrste
- Podrobno se seznanijo s pravili opisovanja novih taksonov po ICZN
- Usposobijo se za ustrezni opis taksona

Objectives:

- Students learn in detail the concept of taxa, especially of the biospecies
- Students get advanced knowledge of ICZN rules of description of new taxa
- Students get skills of the describing a taxon

Predvideni študijski rezultati:

Znanje in razumevanje

- Študent dobi podroben pregled nad definicijami, pomenom in pomembnostjo ustreznega opisovanja taksonov
- Podrobno se seznaniti s principi in pravili opisovanja taksonov v zoologiji po ICZN
- Usposobi se za znanstveno primerno opisovanje taksonov

Prenesljive/ključne spremnosti in drugi atributi

- Študent se usposobi za znanstveno ustrezeno opisa taksona

Intended learning outcomes:

Knowledge and Understanding:

- Student get an advanced overview on the definitions, meaning and importance of appropriate descriptions of taxa
- Student learn in detail about the principles and rules of describing taxa in zoology according to the ICZN
- He/she qualifies for scientifically appropriate describing of taxa

Transferable/Key Skills and other attributes:

- Student qualifies for scientifically appropriate describing of taxa

Metode poučevanja in učenja:

- Predavanja
- Seminar

Learning and teaching methods:

- Lectures
- Seminar

Načini ocenjevanja:**Delež (v %) / Weight (in %)****Assessment:**

- Projekt

100 %

- Project

Materialni pogoji za izvedbo predmeta :

Predavalnica za Power Point predstavitev

Material conditions for subject realization

Lecture room with Power Point facilities

Obveznosti študentov:

(pisni, ustni izpit, naloge, projekti)

Projekt: ponovni opis izbranega taksona in ustna predstavitev

Students' commitments:

(written, oral examination, coursework, projects):

Project: redescription of a selected taxon and oral presentation
