15. References and sources cited in a standard form
16. Supplements (if any)
17. Subject index
18. Biography of the author with the main information about his studies and employment (15-20 rows).

Temeljna literatura in viri / Textbooks:

- Tekoča znanstvena in strokovna periodika s področja, na katerem študent izbere temo svoje doktorske disertacije.
- Current scientific and professional periodicals in the area of candidate's PhD thesis.

Cilji:

Doktorsko delo je pisni dokument, s katerim študent dokaže sposobnost uporabe teoretičnih in raziskovalnih znanj ter v praksi pridobljenih izkušenj za rešitev problema, ki si ga je izbral s prijavo teme diplomskega dela. Iz doktorskega dela mora biti razvisna študentova sposobnost izbire in uporabe domače ter tujne strokovne literature in dodatnih virov za potrebe rešitve izbranega problema.

Objectives:

The PhD thesis is a written document by which the student proves his ability to use the theoretical knowledge and experiences achieved in his practical work for resolving a problem, chosen as a theme of his PhD degree work. With his degree's work the student must present his ability to choose and use the national and international professional texts and additional sources in order to solve the chosen problem.

Predvideni študijski rezultati:

Znanje in razumevanje:

- poznavanje širšega strokovnega področja, na katero sodi kandidatova doktorska disertacija
- formiranje specifičnega znanje ter razumevanje pojmovnika predvidenega doktorskega dela
- aktivno obvladanje metodoloških pristopov za zajemanje, obdelovanje in prikazovanje podatkov

Prenesljive/ključne spremnosti in drugi atributi:

- strokovno zapisovanje in izražanje matematičnih vsebin
- obvladanje reševanja strokovnih problemov, suverena predstavitev ključnih spoznanj in spremnost argumentiranja

Intended learning outcomes:

Knowledge and understanding:

- knowledge of the broader professional field to which belongs the PhD dissertation
- the formation of a special knowledge and understanding of the glossary concerned by the PhD degree work
- an active use of the methodologies for collecting, processing and presenting data of the scientific analysis

Transferable/Key Skills and other attributes:

- expressing mathematical contents in oral and written form
- ability to solve specific mathematical problems and to independently present the key conclusions, based on convincing arguments

Metode poučevanja in učenja:

- mentor na konsultacijah preverja vsebinski in strukturni vidik naloge
- mentor pripravi kandidata na predstavitev doktorskega dela in na verjetna okvirna vprašanja pri zagovoru

Teaching and learning methods:

- the content and the structural aspect of the work is monitored by the tutor during the consultations
- mentor prepares the candidate to clearly present his/her dissertation thesis and to be able to answer the most obvious questions during the defence of the candidates PhD dissertation.
