matematiko

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Moderna optika
Course title:	Modern Optics

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Fizika 2. st.		1	2
Physics 2 nd degree		1	2

Vrsta predmeta / Course type	izbirni / elective
------------------------------	--------------------

Univerzitetna koda predmeta / University course code:	
---	--

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Laboratory work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
35		10			105	5

Nosilec predmeta / Lecturer:	Nataša Vaupotič
------------------------------	-----------------

Jeziki / Languages:	Predavanja / Lectures: Vaje / Tutorial:	slovenski / slovene slovenski / slovene
------------------------	--	--

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: predznanje iz predmetov nihanje in valovanje, elektromagnetizem, matematična fizika 1 in 2, moderna fizika.	Prerequisits: preknowledge of the Oscillations and Waves, Electromagnetism, Mathematical Physics 1 and 2 and Modern Physics.
---	--

Vsebina: Valovna in delčna narava svetlobe; časovna in prostorska koherenca; polarizacija svetlobe. Lom in odboj na ravni površini. Fraunhoferjev in Fresnelov uklon. Potovanje svetlobe v snovi: Maxwellove enačbe v snovi, valovna enačba, kompleksni lomni količnik, potovanje svetlobe v izotropnih dielektrikih, potovanje svetlobe po prevodnikih, optično anizotropni materiali, potovanje svetlobe v kristalih in tekočih kristalih, dvojni lom, elektrooptični in magnetooptični pojav, modulatorji,	Content (Syllabus outline): Wave and particle nature of light; spatial and temporal coherence; polarization. Diffraction and refraction on a plane surface. Fraunhofer and Fresnel diffraction. Light propagation in matter: Maxwell equations in matter, wave equation, complex index of refraction, light propagation in isotropic dielectrics, light propagation in conducting media, anisotropic optical materials, light propagation in crystals and liquid crystals, double refraction, electro-optic and magneto-optic effects,
--	---

optični retarderji, konoskopija.
Nelinearna optika: simetrija v kristalih, nelinearna susceptibilnost, generiranje druge harmonične frekvence, štirivalovno mešanje.

modulators, optical retarders, conoscopy.
Nonlinear optics: symmetries in crystals, second- order nonlinear susceptibility, frequency doubling, four wave mixing.

Temeljni literatura in viri / Readings:

1. G. R. Fowles, Introduction to Modern Optics, 2nd. Ed. (Dover, New York, 1989).
2. R. D. Guenther, Modern Optics (Wiley, New York, 1990).
3. G. Brooker, Modern Classical Optics (Oxford Master Series in Atomic, Optical and Laser Physics) (Oxford University Press, Oxford, 2003).
4. katerakoli knjiga s področja moderne optike, laserjev, optoelektronike ali fotonike

Cilji in kompetence:

Študenti usvojijo osnovno znanje s področja linearne in nelinearne optike in razumejo osnove optičnih preiskav materialov.

Objectives and competences:

Students obtain the basic knowledge from linear and nonlinear optics and understand the basics of the optical study of materials.

Predvideni študijski rezultati:

Znanje in razumevanje:
Elementarno razumevanje principov moderne optike.

Prenesljive/ključne spremnosti in drugi atributi:
Predmet daje predznanje, ki je potrebno za razumevanje dejanskih tehniških problemov v, npr., optoelektroniki, preiskavah v medicini, v preiskavah materialov, ...

Intended learning outcomes:

Knowledge and Understanding:
Fundamental understanding of the principles of modern optics.

Transferable/Key Skills and other attributes:
The modern optics course is a prerequisite to understand several actual engineering problems in e.g. optoelectronics, in medical imaging, in material research, ...

Metode poučevanja in učenja:

Predavanja z demonstracijskimi eksperimenti
Seminarske vaje
vodenost samostojno delo

Learning and teaching methods:

Lectures with demonstration experiments
Theoretical exercises
supervised individual work

Delež (v %) /

Weight (in %)

Assessment:

Aktivna udeležba na seminarjih vajah, izračun teoretičnih nalog in njihov zagovor;	70%	Active work at theoretical exercises; Solving of theoretical exercises and their defense;
ustni izpit	30%	Oral exam
