

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Didaktično-fizikalni praktikum 2
Course title:	Didactical-physical lab 2

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Dvopredmetna izobraževalna fizika	/	1,2	1,3
Double major Educational Physics	/		

Vrsta predmeta / Course type	Obvezni / Obligatory
------------------------------	----------------------

Univerzitetna koda predmeta / University course code:	
---	--

Predavanja Lectures	Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
5			40		75	4

Nosilec predmeta / Lecturer:	dr. Robert Repnik
------------------------------	-------------------

Jeziki / Languages:	Predavanja / Lectures: slovenski / slovene
	Vaje / Tutorial: slovenski / slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Študenti morajo imeti osnovna znanja iz varnega laboratorijskega dela, osnovna znanja iz splošne didaktike.	Prerequisites: Students must have basic knowledge of safe laboratory work, basic knowledge of general didactics.
---	--

Vsebina:	Content (Syllabus outline):
-----------------	------------------------------------

<p>PR:</p> <p>Osnove varnega in didaktično ustreznega laboratorijskega dela v srednji šoli. Kvalitativne in kvantitativne meritve, specifike samostojnega in skupinskega eksperimentalnega dela.</p> <p>Opremljenost fizikalnega kabineta in učilnice za laboratorijsko delo v srednji šoli, prva pomoč ob nesrečah, varnostna pravila.</p> <p>Ergonomija šolskega eksperimentalnega delovnega mesta.</p> <p>LV:</p> <p>Osredotočeno na fizikalno eksperimentalno delo v srednji šoli. Usposobljenost, da študenti znajo samostojno razvito vajo pripraviti na način, primeren za vključevanje v srednješolski pouk fizike. Večji so izvajanja kompleksnejših meritve z različnih fizikalnih področij srednješolske fizike ter uporabe računalnika z vmesnikom in senzorji pri meritvah.</p> <p>Projektna naloga:</p> <p>Samostojno delo: zasnovati in pripraviti motivativno eksperimentalno vajo, izvesti vajo in poročilo o vaji, pripraviti navodila in varnostna opozorila, vajo predstaviti strokovni in laični javnosti ter odgovarjati na vprašanja.</p>	<p>Lectures:</p> <p>Basics of safe and didactical adequate laboratory work in secondary school. Qualitative and quantitative measurements, specifics of a autonomous and group experimental work. Equipment of physics cabinet and classrooms for laboratory work in secondary school, emergency first aid, safety rules.</p> <p>Ergonomics of school experimental workplace.</p> <p>LW:</p> <p>Focusing on physical experimental work in secondary school. Student are able to prepare the self-developed exercise in such a manner, which is suitable for inclusion in the advance teaching of physics. They are skilled to execute complex measurements of various physical fields of secondary school physics and use of computer with interface and sensors at measurements.</p> <p>Project work:</p> <p>Autonomous work: to design and prepare a motivative experimental exercise, execute and prepare report, prepare instructions and safety warnings, present exercise to professional and lay public and to answer questions.</p>
---	--

Temeljni literatura in viri / Readings:

1. Navodila za izvedbo vaj/ Guidelines for the experiments
2. Znanstveni in strokovni članki v znanstvenih in strokovnih revijah / Scientific and technical papers in scientific and technical journals
3. Učbeniki, priročniki in e-gradiva s področja teme / textbooks, handbooks and e-materials on the chosen topic.
4. J. Strnad, Fizika, 1. in 2. del, (DMFA, Ljubljana, 2002)
5. Na spletnih straneh Oddelka za fiziko objavljena elektronska gradiva./ teaching material published on websites of Department of Physics
6. I. Gerlič. Didaktika pouka fizike v OŠ. PEF MB, 1992.
7. I. Gerlič, V. Udir. Problemski pouk fizike v OŠ. Zavod RS za šolstvo, Ljubljana, 2006.

Cilji in kompetence:

- Študenti poglobijo znanja iz didaktike fizike, natančneje s področja fizikalnega eksperimentiranja v srednji šoli.

Objectives and competences:

- Students deepen their knowledge in the field of didactics of physics, specifically in the field of physical experimentation in secondary school.

Predvideni študijski rezultati:

Znanje in razumevanje:

Poglobljeno znanje tem s področij didaktike fizike, osredotočeno na fizikalno eksperimentalno delo v srednji šoli. Razvijejo spremnosti varnega snovanja, izvajanja eksperimentalnih vaj in kompetenco pisnega in verbalnega izražanja pred strokovno in laično javnostjo. Usposobljeni so, da znajo samostojno razvito vajo pripraviti na način, primeren za vključevanje v srednješolski pouk fizike. Vešči so izvajanja osnovnih meritev z različnih fizikalnih področij srednješolske fizike ter uporabe računalnika z vmesnikom in senzorji pri meritvah.

Prenesljive/ključne spremnosti in drugi atributi:

Strokovna in informacijska pismenost. Podajanje znanja za različne razvojne stopnje.

Metode poučevanja in učenja:

Multimedijska predavanja

Vodeno eksperimentalno delo

Problemko učenje

Samostojno terensko in laboratorijsko delo

Intended learning outcomes:

Knowledge and Understanding:

Deeper knowledge in the fields of didactics of physics, focusing on physical experimental work in secondary school. Students develop skills of safe design, execution of experimental exercises and competence in writing and verbal expression in front of professional and lay public. They are able to prepare the self-developed exercise in such a manner, which is suitable for inclusion in the secondary teaching of physics. They are skilled to execute basic measurements of various physical fields of secondary school physics, and use of computer with interface and sensors at measurements.

Transferable/Key Skills and other attributes:

Scientific and informational literacy. Knowledge communication at different development stages.

Learning and teaching methods:

Multimedia lectures

Multimedia lectures

Guided experimental work

Guided experimental work

Problem-based learning

Problem-based learning

Autonomous field and laboratory work

Autonomous field and laboratory work

Delež (v %) /

Načini ocenjevanja:

Weight (in %) **Assessment:**

- a) priprave na vajo
- b) izdelano poročilo laboratorijskih vaj ter zagovor
- c) projektna naloga (izdelava in predstavitev)

- a) 10 %
- b) 70 %
- c) 20 %

- a) preparing on exercise
- b) elaborate a report of laboratory exercises, and defense it
- c) project work (execution and presentation)
