**Pogoji za vključitev v delo oz. za opravljanje  
študijskih obveznosti:**

|                |                  |
|----------------|------------------|
| Ni predpogojev | No prerequisites |
|----------------|------------------|

**Vsebina:**

|                                                                                |
|--------------------------------------------------------------------------------|
| Znanstveno-raziskovalno in praktično delo, ki se nanaša na:                    |
| 1. pomen laboratorijskega in eksperimentalnega dela v okoljskem izobraževanju; |
| 2. načrtovanje okoljskega eksperimenta;                                        |
| 3. ravnanje z opremo in delo z organizmi;                                      |
| 4. varnost v laboratoriju in na terenskem delu;                                |
| 5. metode in oblike laboratorijskega dela v izobraževanju;                     |
| 6. podatki in njihovo pridobivanje: opazovanje, merjenje in eksperiment;       |
| 7. opazovanje:                                                                 |
| 8. meritve:                                                                    |

**Content (Syllabus outline):**

|                                                                               |
|-------------------------------------------------------------------------------|
| Scientific, research and practical work connected with:                       |
| 1. importance of laboratory and experimental work in environmental education; |
| 2. planning of environmental experiments;                                     |
| 3. manipulation with equipment and work with organisms;                       |
| 4. safety in laboratory and field work;                                       |
| 5. methods and forms of laboratory work in education;                         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

#### **Temeljni literatura in viri / Readings:**

Handbook of research on science education / edited by Sandra K. Abell and. Mahwah, N.J. : Lawrence Erlbaum Associates, 2007.

International Handbook of Research on Environmental Education/ Edited by Robert B. Stevenson, Michael Brody, Justin Dillon, Arjen E.J. Wals. Routledge – 2012 – 592 pages

#### **Cilji in kompetence:**

Po zaključku predmeta bo študent usposobljen za:

- načrtovanje, pripravo, izvedbo ter ovrednotenje klasičnih ter računalniško podprtih eksperimentov s področja okoljskega izobraževanja;
- predstaviti svoje seminarsko delo v ustni in pisni obliki.

#### **Objectives and competences:**

After completing the course student will be able to:

- planning, preparation, implementation and assessment of classical and computer supported experiments from the field of environmental education;
- present semminaire work in oral and written form.

#### **Predvideni študijski rezultati:**

##### **Znanje in razumevanje:**

Poznavanje vsebin okoljskega eksperimentiranja; Razumevanje dilem okoljskega izobraževanja podprtga z eksperimenti, Kritična analiza izbranih primerov; Izbor ustreznega znanstvenega instrumentarija za razrešitev raziskovalnih vprašanj razrešljivih z eksperimentom.

##### **Prenesljive/ključne spretnosti in drugi atributi:**

Prenos pridobljenega vedenja ter raziskovalnih spretnosti na druga področja izobraževanja;

#### **Intended learning outcomes:**

##### **Knowledge and understanding:**

Knowledge about content of environmental experimentation; Comprehension of dilemmas of experiment-supported environmental education; Critical analysis of selected experiments; Selection of appropriate scientific inventory to solve research questions on environmental experimentation.

##### **Transferable/Key Skills and other attributes:**

Transfer of knowledge and research skills on other fields of education.
