

EURAXESS Hubs Idea Lab

WHAT IS EURAXESS IDEA LAB: An online workshop to enable knowledge sharing from the EURAXESS network towards the piloted EURAXESS hubs and vice versa. The event should contribute to inclusiveness of EURAXESS Hubs activities – we want to make sure that everybody can understand the concept behind the EURAXESS Hubs, contribute to their formation and benefit from their outcomes.

WHO SHOULD PARTICIPATE: Colleagues from BHO organisations and/or EURAXESS members with expertise in the topics covered by any of the three piloted EURAXESS Hubs.

- Number of participants in the first session is not limited.
- Each national network should nominate one participant for the brainstorming session.
- Only BHOs can register participants for this event.

STRUCTURE OF THE EVENT:

The first session will focus on explaining the rationale behind the EURAXESS Hubs and how it should contribute to future development of EURAXESS network. Activities of three piloted hubs will be presented.

The second session will offer a space for discussions of EURAXESS members with experience or strong interest in the topics covered by three piloted hubs. Every piece of experience, question, suggestion, or idea is welcome!

The three piloted hubs are:

Talent management HUB: The hub will focus on assisting young talents – early-stage researchers in learning and mastering innovative skills for successful research careers. The hub will also address support of female researchers and career opportunities for researchers in public sector.

Researcher careers beyond academia HUB: The hub will focus on bringing closer early career researchers with potential non-academic research employers in order to help researchers to become more aware about their professional options beyond academia.

Scientific start-up entrepreneurship HUB: The hub will focus on a novel service for providing signposting and personalized assistance services to researchers, pursuing start-up entrepreneurship careers.

AGENDA

SESSION 1: INTRODUCING EURAXESS HUBS	
13.00 - 13.15	Why EURAXESS Hubs? <i>Adam Molnar, BZN Hungary, project coordinator</i>
