**Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:**

Jih ni.	No.
---------	-----

**Vsebina:**

Razumevanje biologije celice je temeljno za razumevanje drugih področij biologije. Pri predmetu se študenti seznanijo z metodami, ki se uporabljajo v moderni biologiji celice in s kemijsko sestavo celic. Študentje spoznajo celične strukture in njihove funkcije.

Povzetek vsebin:

Izvor celic, organizacija evkariotske in prokariotske celice; modelni organizmi v biologiji celice

**Content (Syllabus outline):**

Understanding the biology of the cell is an fundamental research area to all biological sciences.

This subject provides an introduction to the methods for studying cells and the chemical structure of cells. It focuses on cell structures and their functions.

Abstract of contents:

Molekularna sestava celic	The origin of cells, organisation of eucariotic and procariotic cell; cells as experimental models
Metode proučevanja celic	The molecular composition of cells
Celične membrane	Tools of cell biology
Transport snovi skozi membrano	Cell membranes
Mitohondriji in mehanizem oksidativne fosforilacije	Membrane transport
Endoplazemski retikulum	Mitochondria and the mechanism of oxidative phosphorylation
Golgijev aparat	The endoplasmic reticulum
Lizosomi in peroksisomi	The Golgi apparatus
Citoskelet in gibanje celice (aktinski filamenti, intermediatni filamenti in mikrotubuli)	Lysosomes and peroxisomes
Jedro, jedrna ovojnica in transport snovi med jedrom in citoplazmo	The cytoskeleton and cell movement (actin filaments, intermediate filaments and microtubules)
Kromatin in kromosomi	The nucleus, nuclear envelope and traffic between the nucleus and cytoplasm
Celični ciklus	Chromatin and chromosomes
Mitoza in mejoza	Cell cycle
Medcelične povezave	Mitosis and meiosis
Apotoza in nekroza	Cell-cell interactions
	Apoptosis and necrosis

#### Temeljni literatura in viri / Readings:

- Alberts B. s sod. (2011) Molecular biology of the cell, 5th Ed. Garland Science, New York.
- Alberts B. s sod. (2009) Essential cell biology. Garland Science, New York.
- Karp G. (2005) Cell and Molecular Biology. Concepts and Experiments. John Wiley & Sons, Inc., New York.
- Lodish H. s sod. (2010) Molecular Cell Biology. W.H. Freeman, New York.
- Jezernik K., Veranič P., Sterle M. (2012) Celična biologija. Učbenik za študente Medicinske fakultete. DZS, Ljubljana.

#### Cilji in kompetence:

Razumevanje metod, ki se uporabljajo v moderni biologiji celice  
Poznavanje struktur in razumevanje osnovnih procesov v celicah  
spoznajo področja, na katerih se uporabljajo znanja biologije celice (npr. ekologija, kmetijstvo, biotehnologija in medicina).

#### Objectives and competences:

Understanding of basic methods used in modern cell biological research  
Knowledge of cell structures and understanding of basic cell processes  
In addition, students get to know the areas in which cell biology is applied (e. g. ecology, agriculture, biotechnology and medicine).

#### Predvideni študijski rezultati:

#### Intended learning outcomes:

<b>Znanje in razumevanje:</b> Študenti razumejo metode, ki se uporabljajo v moderni biologiji celice Študenti pridobijo znanja o biologiji celice, ki so nujno potrebna na drugih področjih biologije Študenti se seznanijo, na katerih področjih se aplicirajo znanja biologije celice (npr. ekologija, kmetijstvo).	<b>Knowledge and understanding:</b> Students understand methods used in modern cell biology research Students capture knowledge of cell biology that is essential to other subjects in the field of biology Students get knowledge of areas in which cell biology is applied (e.g. ecology, agriculture, biotechnology).
<b>Prenesljive/ključne spremnosti in drugi atributi:</b> Študenti se usposobijo za delo v biološkem laboratoriju pri zahtevnejših bioloških eksperimentih Študenti pridobijo izkušnje in spremnosti, ki so nujno potrebne pri samostojnem laboratorijskem delu.	<b>Transferable/Key Skills and other attributes:</b> Students qualify for work in the biological laboratory at advanced biological experiments Students acquire experience and skills that are essential for individual laboratory work.

<b>Metode poučevanja in učenja:</b>	<b>Learning and teaching methods:</b>	
Predavanja	Lectures	
Laboratorijske vaje	Laboratory excercises	
	Delež (v %) /	
<b>Načini ocenjevanja:</b>	<b>Weight (in %)</b>	<b>Assessment:</b>
Pisni in praktični kolokviji	40	Written and practical examinations
Pisni izpit	60	Written examination
