Practical skills in insect determination

**Predvideni študijski rezultati:**

o uspešno opravljene učne enote naj bi bili študenti zmožni:

- pojasniti temeljne značilnosti telesne organizacije žuželk;
- razumeti in pojasniti kompleksno vlogo žuželk v ekosistemih;
- primerjati holometabolne in hemimetabolne žuželke in pojasniti prednosti teh dveh strategij;
- opredeliti značilnosti in določiti žuželke do glavnih redov.

Intended learning outcomes:

By the end of this course students should be able to:

- explain fundamentals of the insect 'Bauplan';
- understand and explain complex role of insects in ecosystems;
- compare holometabolous and hemimetabolous insects and explain advantages of the two strategies;
- identify insects to the order level and define taxonomic features of the orders.
