#### Cilji in kompetence:

- Predstaviti temeljne skupine nevretenčarjev
- Podati povezavo med gradbenim planom in načinom življenja
- Predstaviti raznolikost in kompleksnost nevretenčarjev
- Podati evolucijski pristop pri študiju nevretenčarjev

#### Objectives and competences:

- To present fundamental invertebrate groups
- To give the relations between animal "Bauplan" and its environment
- To present diversity and complexity of Animal Kingdom
- To give an evolutionary approach in the study of invertebrates

#### Predvideni študijski rezultati:

#### Intended learning outcomes:

Po uspešno opravljeni učni enoti naj bi bili študenti zmožni:

- opisati, primerjati in razlikovati predstavnike glavnih debel nevretenčarjev;
- prepoznati nevretenčarje do nivoja redov in definirati njihove diagnostične značilnosti;
- opredeliti in zagovarjati glavne evolucijske trende pri deblih nevretenčarjev.

By the end of this course students should be able to:

- describe, discriminate and compare traits of the invertebrate phyla;
- identify invertebrates to the order level and define their diagnostic traits;
- define and justify main evolutionary trends in the invertebrate phyla.

#### Metode poučevanja in učenja:

- Predavanja
- Laboratorijske vaje – individualno eksperimentalno delo
- Terensko delo

#### Learning and teaching methods:

- Lectures
- Laboratory exercises – individual experimental practice
- Field work
