

### UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	<b>Splošna zoologija</b>
Course title:	<b>Fundamentals of Zoology</b>

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
<b>Biologija, 1. stopnja</b>			
<b>Biology, 1<sup>st</sup> cycle</b>		<b>1.; 1<sup>st</sup></b>	<b>2.; 2<sup>nd</sup></b>

Vrsta predmeta / Course type

Obvezni/Compulsory

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
45			45		90	6

Nosilec predmeta / Lecturer:

Tina Klenovšek

Jeziki / Languages:	Predavanja / Lectures:	slovenščina / Slovene
	Vaje / Tutorial:	slovenščina / Slovene

Pogoji za vključitev v delo oz. za opravljanje  
študijskih obveznosti:

Jih ni.

None.

#### Vsebina:

- Osnovne značilnosti živali in živalske celice.
- Osnovni taksonomski in filogenetski pregled živali. Delitev živali glede na različne kriterije.
- Zunanja zgradba glavnih skupin živali.
- Osnovna zgradba, vloga in delovanje živalskih tkiv: epitelno in žlezno tkivo, veziva in opornine, mišično tkivo, živčno tkivo.
- Zgradba, delovanje in vloga organskih

#### Content (Syllabus outline):

- Basic characteristics of animals and animal cells.
- Basic taxonomic and phylogenetic overview of animals. Division of animals according to various criteria.
- External structure of major animal groups.
- Basic structure, role and function of animal tissues: epithelial and gland tissues, connective and skeletal tissues, muscle tissue, nervous tissue.

<p>sistemov in organov živali: integument, ogrodje, gibala, prehranjevanje in prebavila, dihanje in dihala, organi za transport snovi, osmoregulacija, izločanje in izločala, čutila, živčevje, endokrini sistem, reproaktivni sistem.</p> <ul style="list-style-type: none"> <li>- Pregled in primerjava organskih sistemov pri glavnih skupinah živali.</li> <li>- Različni načini in zakonitosti nespolnega in spolnega razmnoževanja. Ontogenetski razvoj.</li> <li>- Laboratorijske vaje se navezujejo na vsebino posameznih poglavij iz predavanj s povdarkom na spoznavanju histologije, morfologije in anatomije živali in njihovih struktur.</li> </ul>	<ul style="list-style-type: none"> <li>- Structure, role and function of organ systems and organs of animals: integumentary system, skeleton, motion organs, feeding and digestion organs, breathing and respiratory organs, circulatory systems, osmoregulation, excretion and excretory systems, sense organs, nervous system, endocrine system, reproductive system.</li> <li>- Overview and comparison of organ systems in the major animals groups.</li> <li>- Different types and characteristics of asexual and sexual reproduction. Ontogenetic development.</li> <li>- Laboratory exercises are linked with the content of individual lectures with emphasis on histology, morphology and anatomy of animals and their structures.</li> </ul>

#### Temeljni literatura in viri / Readings:

Hickman, C. P. Jr., Roberts, L. S., Keen, Susan L., Eisenhour, D. J., Larson, A., l'Anson, H., 2014: Integrated Principles of Zoology. McGraw Hill. New York.

Štrus, J., 2002: Splošna zoologija. 2. popravljena izd. Študentska založba. Ljubljana.

Miller, S. A., Harley, J. P., 2010: Zoology. McGraw-Hill Higher education, Boston, USA.

Klenovšek, T., Lipovšek Delakorda, S., 2013: Splošna zoologija : kompendij z navodili za vaje za študijski program Biologija. Maribor: Fakulteta za naravoslovje in matematiko, Oddelek za biologijo.

#### Cilji in kompetence:

Študentje bodo pridobili temeljno znanje in razumevanje:

- o značilnostih živalskih organizmov in zakonitosti življenja živali z vidika raznolikosti in obenem enotnosti.
- osnovne zgradbe živalskih organizmov in njihovo delovanje na nivoju celic, tkiv, organov, organskih sistemov in skupnosti organizmov.
- osnovnih procesov razvoja in razmnoževanja živalskih organizmov.

Študentje bodo pridobili tudi spretnosti in

#### Objectives and competences:

Students will gain fundamental knowledge and understanding of:

- characteristics of animal organisms and principles of animal life from the aspect of variation as well as uniformity.
- basic structure of animal organisms and their function on the level of cells, tissues, organs, organ systems and associations of animals.
- of the basic processes in animal development and reproduction.

Students will also gain skills and practical abilities for microscopy, dissection of animals,

praktične sposobnosti mikroskopiranja, sekcije živali, prepoznavanja in poimenovanja histoloških, morfoloških in anatomskih struktur živalskih organizmov.

recognition and naming of histological, morphological and anatomical structures of animal organisms.

#### **Predvideni študijski rezultati:**

Po opravljenem kurzu naj bi bili študentje sposobni:

- našteti in opisati glavne značilnosti živali in živalske celice.
- opisati in pojasniti osnovno taksonomsko in filogenetsko delitev živali glede na različne kriterije.
- opisati in razlikovati zunano telesno zgradbo glavnih skupin živali.
- opisati in razlikovati živalska tkiva in pojasniti njihovo vlogo in delovanje.
- navesti in pojasniti zgradbo, delovanje in vlogo organov in organskih sistemov pri različnih skupinah živali.
- opisati različne načine in zakonitosti spolnega in nespolnega razmnoževanja in ontogenetskega razvoja.
- samostojno mikroskopirati s svetlobnim mikroskopom.
- po navodilih samostojno in varno secirati manjšo žival.
- prepoznati in poimenovati najpomembnejše strukture na mikropskopskih in makropskopskih preparatih živali.

#### **Intended learning outcomes:**

After the accomplished course the students should be able to:

- list and describe the main characteristics of the animals and animal cells.
- describe and clarify the basic taxonomic and phylogentic division of animals according to different criteria.
- describe and distinguish the external body structure of the main groups of animals.
- describe and distinguish animal tissues and clarify their role and function.
- indicate and clarify the structure, function and role of organs and organ systems in different animal groups.
- describe different types of sexual and asexual reproduction and ontogenetic development.
- independently use the light microscope.
- following instructions, independently and safely dissect a smaller animal.
- identify and name the most important structures on microscopic and macroscopic preparations of animals.

#### **Metode poučevanja in učenja:**

- Predavanja
- Laboratorijske vaje

#### **Learning and teaching methods:**

- Lectures
- Laboratory excercises

Delež (v %) /

Weight (in %)

**Assessment:**

#### **Načini ocenjevanja:**

- Kolokvij in poročilo iz vaj
- Pisni izpit

Poročilo iz vaj je pogoj za pristop h kolokviju iz vaj. Opravljen kolokvij iz vaj je pogoj za pristop k izpitu.

50

50

- Report and exam from laboratory exercises
- Written exam

Report from laboratory exercises is a prerequisite for the exam from laboratory exercises, which is both a prerequisite for the final exam.
