- Brooker R. J. 2012. Genetics – analysis and principles. Fourth Edition. The McGraw-Hill Companies, Inc. New York.
- Šiško M. 2022. Zbirka računskih nalog iz genetike. Fakulteta za kmetijstvo in biosistemske vede, Maribor.
- Griffiths AJF, Wessler SR, Lewontin RC, Gelbart WM, Suzuki DT, Miller JH. 2005. Introduction to genetic analysis. W.H. Freeman and Company, New York.
- Pierce B A. 2005. Genetics. A conceptual approach. Second Edition. W. H. Freeman and Company, New York.
- Stansfield DS. 1991. Theory and problems of genetics. Schaums outline series.McGraw-Will, inc.

### Cilji in kompetence:

### Objectives and competences:

|  |  |
|--|--|
| <ul style="list-style-type: none"> <li>- Poznavanje in razumevanje molekulske genetike, citogenetike, kvalitativne genetike, populacijske genetike in kvantitativne genetike evkariontov .</li> <li>-Zmožnost poznavanja in razumevanja genetike za reševanje problemov povezanih s prenosom lastnosti na potomstvo.</li> <li>-Zmožnost interpretiranja podatkov na osnovi laboratorijskih opazovanj in meritev glede na njihovo pomembnost in njihovega povezovanja z ustrezeno teorijo.</li> </ul> | <ul style="list-style-type: none"> <li>- Knowing and understanding of molecular genetics, cytogenetics, Mendelian genetics, population genetics of eukaryotes, and quantitative genetics of eukaryotes.</li> <li>-The students will be able to use knowledge for solving problems about transferring traits from parents to offspring.</li> <li>-The students will be able to interpret data obtained on laboratory observations and measurements and their connection with appropriate theory.</li> </ul> |
|--|--|

#### Predvideni študijski rezultati:

Znanje in razumevanje:

Študent bo poznal in razumel:

- osnove molekulske genetike evkariontov,
- osnove citogenetike in fizikalne osnove dednosti evkariontov,
- dednost kvalitativnih lastnosti,
- osnovo populacijske genetike evkariontov in
- bo sposoben izračunati srednje vrednosti in variance posameznih generacij, izračunati heritabilnost.

#### Intended learning outcomes:

Student will be able to understand:

- basis of molecular genetics of eukaryotes,
- basis of cytogenetics and physical basis of heredity of eukaryotes ,
- Mendelian genetics – inheritance of qualitative traits,
- basis of population genetics of eukaryotes, and Will be able to calculate generation mean values and variances, estimation of heritability.

#### Metode poučevanja in učenja:

Predavanja

Laboratorijske vaje

#### Learning and teaching methods:

Lectures

Laboratory practicals

Delež (v %) /

Weight (in %)    Assessment:

|                     |       |  |
|---------------------|-------|--|
| Načini ocenjevanja: | 100 % | Delež (v %) / Weight (in %)    Assessment: |
| Pisni izpit         |       | Written exam                               |
