

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Sistematika in filogenija vrtenčarjev
Course title:	Systematics and phylogeny of vertebrates

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Univerzitetni študijski program Ekologija z naravovarstvom, 1. stopnja			
Undergraduate university programme Ecology with Nature Conservation, 1st degree		2. 2nd	3. 3rd

Vrsta predmeta / Course type

Obvezni/Obligatory

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
30			30		90	5

Nosilec predmeta / Lecturer:

Franc Janžekovič

Jeziki / Languages:	Predavanja / Lectures: Vaje / Tutorial:	slovenski / slovene
------------------------	--	---------------------

**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

Jih ni.

No.

Vsebina:

Diverziteta in diagnoza vretenčarjev,
Vertebrata.
Evolucijski nastanek strunarjev, filogenetski
odnosi in adaptivna radiacija.
Sistematika, nomenklatura in sistematski
znaki.
Funkcionalna anatomija vretenčarjev.
Zgodnji razvoj in embriologija vretenčarjev.
Biologija posameznih skupin vretenčarjev in
njihova vloga v okolju.

Content (Syllabus outline):

Diversity and diagnosys of vertebrates.
Origin of vertebrates, phylogenetic
relationships and adaptive radiations.
Systematics, nomenclature and systematic
signs.
Functional anatomy of vertebrates.
Early development and embryology.
Biology of vertebrate groups and their role
within the environment.

Temeljni literatura in viri / Readings:

- Kent G., R. K. Carr, 2001: Comparative anatomy of the vertebrates. McGraw-Hill Higher Education. New York.
- Liem, K. F., W. E. Bemis , W. F. Walker , L. Grande, 2001: Functional Anatomy of the Vertebrates. An Evolutionary Perspective. Harcourt College Publishers. Orlando.
- Kardong, K. V., 2011: Vertebrates: comparative anatomy, function, evolution. McGraw- Hill Companies. New York.
- Pough, F. H., C. M. Janis, J.B. Heiser, 2005: Vertebrate Life. Pearson Education International. New Jersey.
- Storch V., U. Welsch, 2004: Systematische Zoologie. Spektrum Akademischer Verlag Heidelberg. Berlin. Dorit, R.L., W. F. Walker, R. D. Barnes, 1991: Zoology. Saunders College Publishing. Philadelphia.
- Kalezić, M., 2001: Osnovi morfologije kičmenjaka. Zavod za udžbenike i nastavna sredstva. Beograd.
- Kryštufek, B., F. Janžekovič, 1999: Ključ za določanje vretenčarjev Slovenije. DZS. Ljubljana.

Cilji in kompetence:

- Podati pregled sistema vretenčarjev
- Podati biotsko - ekološke značilnosti vretenčarjev
- Predstavitev evolucijskega nastanka vretenčarjev, filogenetskih odnosov in adaptivne radiacije
- Predstavitev metod dela in znanstvenih načel v sistematiki vretenčarjev
- Predstavitev ekomorfoloških ter funkcionalno anatomskih lastnosti vretenčarjev
- Predstavitev embriološkega razvoja vretenčarjev

Objectives and competences:

- To give the systematic overview of vertebrates.
- To give biotic and ecological characteristics of vertebrates.
- Introduction of evolutionary origin of vertebrates, phylogenetic relationships and adaptive radiation.
- Introduction of methods and scientific principles in vertebrates systematics.
- Introduction of ecomorphological and functional anatomical characteristics of vertebrates.
- Introduction of embryological

	development of vertebrates.
--	-----------------------------

Predvideni študijski rezultati:

Znanje in razumevanje:

- Razumevanje filogenetskih odnosov med glavnimi skupinami vretenčarjev
- Prepoznavanje in določanje vretenčarjev
- Znanja in razumevanja ekološke vloge vretenčarjev v ekosistemih
- Znanja in razumevanja metod dela v sistematiki, taksonomiji in ekologiji vretenčarjev
- Razumevanje evolucijskih adaptacij ter njihove funkcionalne morfološko-ekološke povezanosti
- Znanja embriološkega razvoja vretenčarjev

Prenesljive/ključne spremnosti in drugi atributi:

- Determinacija evropskih vretenčarjev
- Presoja in interpretacija vloge vretenčarjev v ekosistemu
- Strokovno in raziskovalno delo iz ekologije in ekomorfologije vretenčarjev

Metode poučevanja in učenja:

- Predavanja
- Laboratorijske vaje

Intended learning outcomes:

Knowledge and understanding:

- Knowledge and Understanding:
- Understanding phylogenetic relationships among major vertebrates groups.
- Recognition and identification of vertebrates.
- Knowledge and understanding of ecological role in ecosystems.
- Knowledge and understanding of methods in systematics and ecology of vertebrates.
- Understanding of evolutionary adaptations and their functional morphological-ecological relationships.
- Knowledge of embryologic development

Transferable/Key Skills and other attributes:

- Determination of European vertebrates
- Judgement and interpretation of vertebrates role within an ecosystem
- Expert and research work in ecology and ecomorphology of vertebrates

Learning and teaching methods:

- Lectures
- Laboratory excercises

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:			
<ul style="list-style-type: none"> • Ustni izpit, • kolokvij 	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 40%;">70</td> <td style="width: 40%;">30</td> <td style="width: 20%;"></td> </tr> </table>	70	30		<ul style="list-style-type: none"> • Oral exam, • Exercises exam
