

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Splošna zoologija
Course title:	Fundamentals of Zoology

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Univerzitetni študijski program Ekologija z naravovarstvom, 1. stopnja			
Undergraduate university programme Ecology with Nature Conservation, 1st degree		1.; 1st	2.; 2nd

Vrsta predmeta / Course type	Obvezni/Obligatory
------------------------------	--------------------

Univerzitetna koda predmeta / University course code:	
---	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
45			45		90	6

Nosilec predmeta / Lecturer:	Tina Klenovšek
------------------------------	----------------

Jeziki / Languages:	Predavanja / Lectures: Vaje / Tutorial:	slovenski / slovene slovenski / slovene
------------------------	--	--

**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

Jih ni.	None.
---------	-------

Vsebina:	Content (Syllabus outline):
-----------------	------------------------------------

- | | |
|--|---|
| <ul style="list-style-type: none"> - Osnovne značilnosti živali in živalske celice. - Osnovni taksonomski in filogenetski pregled živali. Delitev živali glede na različne kriterije. - Zunanja zgradba glavnih skupin živali. - Živalska tkiva: epitelno in žlezno tkivo, veziva in opornine, mišično tkivo, živčno tkivo. - Zgradba in funkcija organskih sistemov in organov živali: integument, ogrodje, gibala, prebavila, dihala, organi za transport snovi, izločala, čutila, živčevje, endokrini sistem, reproduktivni sistem. - Pregled in primerjava organskih sistemov pri glavnih skupinah živali. - Razmnoževanje: različni načini nespolnega in spolnega razmnoževanja. | <ul style="list-style-type: none"> - Basic characteristics of animals and animal cells. - Basic taxonomic and phylogenetic overview of animals. Division of animals according to various criteria. - External structure of major animal groups. - Animal tissues: epithelial and gland tissues, connective and skeletal tissues, muscle tissue, nervous tissue. - Structure and function of organ systems and organs of animals: integumentary system, skeleton, motion organs, digestion organs, respiratory organs, circulatory systems, excretory systems, sense organs, nervous system, endocrine system, reproductive system. - Overview and comparison of organ systems in the major animals groups. - Reproduction: different methods of asexual and sexual reproduction. |
|--|---|

Temeljni literatura in viri / Readings:

- | |
|--|
| <p>Hickman, C. P. Jr., Roberts, L. S., Keen, Susan L., Eisenhour, D. J., Larson, A., l'Anson, H., 2014: Integrated Principles of Zoology. McGraw Hill. New York.</p> <p>Štrus, J., 1999: Splošna zoologija. Študentska založba, Ljubljana.</p> <p>Miller, S. A., Harley, J. P., 2010: Zoology. McGraw-Hill Higher education, Boston, USA.</p> <p>Klenovšek, T., Lipovšek Delakorda, S., 2013: Splošna zoologija : kompendij z navodili za vaje za študijski program Biologija. Maribor: Fakulteta za naravoslovje in matematiko, Oddelek za biologijo.</p> |
|--|

Cilji in kompetence:

- | |
|---|
| <ul style="list-style-type: none"> - Pridobitev znanja o osnovnih zakonitostih življenja živali z vidika raznolikosti in obenem enotnosti. - Sposobnost razumeti in pojasniti osnovno zgradbo živalskih organizmov in njihovo delovanje na nivoju celic, tkiv, organov, organskih sistemov in skupnosti organizmov. - Sposobnost razumeti in pojasniti osnovne procese razmnoževanja živalskih organizmov. |
|---|

Objectives and competences:

- | |
|---|
| <ul style="list-style-type: none"> - To gain knowledge on fundamental principles of animal life in aspect of variation and uniformity. - To gain the understanding and ability to explain fundamental structures of animal organisms and their function on the levels of cells, tissues, organs, organ systems and associations of animals. - To understand and be able to explain basic processes in animal reproduction. |
|---|

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje: <ul style="list-style-type: none"> - Osnovnih metod eksperimentalnega dela v zoologiji. - Struktur in funkcij živali od celice do organizma. - Razumevanje strukturnih prilagoditev, življenjskih procesov in življenjskih ciklov pri živalih. 	Knowledge and understanding: <ul style="list-style-type: none"> - of fundamental experimental methods in zoology. - of structures and functions of animals from the cell to organismal level. - of the structural adaptations, life processes and life cycles of animals.
Prenesljive/ključne spremnosti in drugi atributi: <ul style="list-style-type: none"> - Sposobnost dela z optičnim mikroskopom - Sposobnost sekcije manjših živali - Poznavanje osnovne zgradbe in funkcije živali od celice do organizma 	Transferable/Key Skills and other attributes: <ul style="list-style-type: none"> - Qualification for work with optical microscope. - Ability of section of small animals. - Fundamental knowledge on structure and function of animals from cell to organism.

Metode poučevanja in učenja:

- Predavanja
- Laboratorijske vaje

Learning and teaching methods:

- Lectures
- Laboratory excercises

Delež (v %) /

Načini ocenjevanja:	Weight (in %)	Assessment:
<ul style="list-style-type: none"> • Kolokvij in poročilo iz vaj • Pisni izpit <p>Poročilo iz vaj je pogoj za pristop h kolokviju iz vaj. Opravljen kolokvij iz vaj je pogoj za pristop k izpitu.</p>	50 50	<ul style="list-style-type: none"> • Report and exam from laboratory exercises • Written exam <p>Report from laboratory exercises is a prerequisite for the exam from laboratory exercises, which is both a prerequisite for the final exam.</p>
