 Pogoji za vključitev v delo oz. za opravljanje
 študijskih obveznosti:

Jih ni.

No.

Vsebina:

Predmet obsega vsa ključna poglavja genetike (evkariotov):

Molekulska genetika evkariotov - molekularna struktura in replikacija genetskega materiala, molekularne lastnosti in funkcija genov.

Citogenetika in fizikalne osnove dednosti evkariotov -struktura in funkcija kromosomov, celična delitev, gametogeneza, oploditev.

Kvalitativna genetika evkariotov –nevezani geni, Mendlova pravila, dednost kvalitativnih lastnosti, genske interakcije, poliploidija (evploidija, aneuploidija), statistično testiranje segregacijskih razmerij, vezani geni, crossing-over,genetske mape, genetika spolnosti.

Populacijska genetika evkariotov -struktura populacij, populacijsko ravnotežje, migracije, mutacije, selekcija, inbreeding, incest.

Kvantitativna genetika evkariotov -srednje vrednosti in variance posameznih generacij, izračunavanje heritabilnosti. Izobraževalni proces (še posebej eksperimentiranje) bo upošteval vse veljavne moralno- etične omejitve.

Content (Syllabus outline):

The subject includes all essential parts of genetics (of eukaryotes):

Molecular genetics of eukaryotes – molecular structure and replication of the genetic material, molecular properties and function of genes.

Cytogenetics and physical basis of heredity of eukaryotes chromosome structure and function, cell division, gametogenesis, fertilisation. Mendelian genetics – inheritance of qualitative traits, Mendelian rules, genetic linkage, polyploidy (euploidy, aneuploidy), statistical testing of segregation ratios, genetic linkage, crossing-over, genetic maps, genetics of sex.

Population genetics of eukaryotes -structure of populations, population equilibrium, migrations, mutations, selection, inbreeding.

Quantitative genetics of eukaryotes – generation mean values and variances, estimation of heritability.

Teaching approach, especially practical experimentation, will consider all existing moral and ethical rules.

Temeljni literatura in viri / Readings:

- Brooker R. J. 2012. Genetics – analysis and principles. Fourth Edition. The McGraw-Hill Companies, Inc. New York.
- Pierce B. A. 2005. Genetics. A conceptual approach. Second Edition. W. H. Freeman and Company, New York.
- Griffiths, A. J. F., S. R. Wessler, R. C. Lewontin, W. M. Gelbart, D. T. Suzuki, J. H. Miller, 2005: Introduction to genetic analysis. Eighth Edition. W. H. Freeman and Company, New York.
- Stansfield D.W. 1991. Theory and problems of Genetics. Schaum's Outlines series, McGraw-Hill, INC., New York.

Cilji in kompetence:

Osnovni cilj te učne enote je dati celovit in sistematičen pregled:
molekulske genetike,
citogenetike,
kvalitativne in
kvantitativne genetike evkariontov.
Vključeni so teoretični in praktični problemi genetike rastlin, živali in ljudi.

Objectives and competences:

The main purpose of this study unit is to give a complete and systematic overview of:
molecular genetics,
cytogenetics,
qualitative and quantitative genetics of eukaryotes.
It will include theoretical and practical hereditary problems of plants, animals and humans.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Znanje in razumevanje, ki si ga študentje pridobijo obsega naslednjo problematiko:
načine funkcioniranja genetskega materiala,
načine dedovanja in genetsko strukturo ter procese v populacijah evkariontov.

Prenesljive/ključne spremnosti in drugi atributi:

Oblikovanje generacijskega materiala za proučevanje dednosti in analiza segregacije v potomstvih.

Intended learning outcomes:**Knowledge and understanding:**

It involves the following subjects:
the function of the hereditary material,
the most important ways of inheritance and the structure and processes within populations of eukaryotes.

Transferable/Key Skills and other attributes:

Formation of generation material for inheritance studies, analysis of segregation within progenies.

Metode poučevanja in učenja:**Learning and teaching methods:**

Predavanja
Laboratorijske vaje

Lectures
Laboratory practicals

Delež (v %) /

Weight (in %) **Assessment:**

Pisni izpit

100

Written exam
