<b>Jeziki / Languages:</b>	<b>Predavanja / Lectures:</b> slovensko / Slovenian
	<b>Vaje / Tutorial:</b> slovensko / Slovenian

**Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:**

Priporočljivo je predznanje na področjih mehanike, termodinamike in matematičnih metod v fiziki.

Vsaka izmed naštetih obveznosti v načinih ocenjevanja mora biti opravljena s pozitivno oceno. Opravljen projekt je pogoj za pristop k pisnemu izpitu. Pozitiven pisni izpit je pogoj za pristop k ustnemu izpitu.

Recommended is preknowledge in the field of mechanics, thermodynamics and mathematical methods in physics.

Each of the listed obligations in the assessment methods must be completed with a positive grade. Completed project is a prerequisite for taking the written exam. A positive grade of the written exam is a prerequisite for taking the oral exam.

**Vsebina:**

- Deformacije in napetosti v trdnih telesih
- Strižne deformacije
- Statika nosilca, konzole, plošče in oboka

**Content (Syllabus outline):**

- deformations and strains in condensed matter
- shear deformations
- statics of carriers, consoles, plates and arch

- Statika in napetosti v podprtih nosilcih in ploščah
- Napetosti v tlačnih posodah
- Gibalne enačbe za tekočine
- Mehanika tekočin – valovanje na vodni površini

- statics and strains in underpinned carriers and plates
- strains in pressure containers
- equations for fluid motion
- fluid mechanics – waves on water surface

#### **Temeljni literatura in viri / Readings:**

- R. Podgornik, Mehanika kontinuov, 2002; prosto dostopno na <http://www-f1.ijs.si/~rudi/lectures/mk-1.9.pdf>
- L.D. Landau, E.M. Lifshitz, Theory of Elasticity, Pergamon Press, New York 1986.
- D.J. Acheson, Elementary fluid dynamics, Clarendon Press, Oxford, 1990.
- T. E. Faber, Fluid dynamics for physicists, Cambridge University Press, Cambridge 1997.

#### **Dodatna literatura / Additional Readings**

- P. K. Kundu, Fluid mechanics, Academic Press, San Diego, 1990.
- L.D. Landau, E.M. Lifshitz, Fluid mechanics, Pergamon Press, New York, 1989.
- R.J. Atkin, An introduction to the theory of elasticity, Longman, London, 1980.
- A. Borštnik, R. Podgornik, M. Vencelj, Rešene naloge iz mehanike kontinuov, DMFA, Ljubljana, 2001.

#### **Cilji in kompetence:**

Študent usvoji kompleksno razumevanje fizikalnih zakonitosti in sposobnost le-te kvantitativno opisati, napovedati in izračunati rezultate.

#### **Objectives and competences:**

Student gains complex understanding of physical laws and ability to qualitatively describe them, predict and calculate results.

#### **Predvideni študijski rezultati:**

##### **Znanje in razumevanje:**

Po uspešno zaključeni učni enoti je študent zmožen:

- uporabiti teoretično znanje za obravnavo deformacij v trdnih telesih in statike,
- uporabiti enačbe za gibanje tekočin pri obravnavi pojmov v tekočinah,
- uporabiti matematična orodja in metode za reševanje fizikalnih problemov povezanih z deformacijami trdnin in tekočin,
- tvoriti ustrezne matematične modele za reševanje problemov pri izbranih

##### **Intended learning outcomes:**

On completion of this course student will be able to:

- use theoretical knowledge to study phenomena of deformations of solids and statics,
- use equation for fluid movement to research mechanics of continuous media,
- use mathematical tools and methods to solve problems in the field of deformation of solids and fluids.
- form appropriate mathematical models to solve problems in the field of fluid

<p>primerih s področja gibanja tekočin, deformacij trdnin in statike,</p> <ul style="list-style-type: none"> <li>• oblikovati ustrezne robne pogoje matematičnih modelov,</li> <li>• vrednotiti in interpretirati dobljene rezultate in aplikacija v realne sisteme.</li> </ul> <p><b>Prenesljive/ključne spremnosti in drugi atributi:</b> Reševanje fizikalnih in tehničnih problemov z matematičnimi orodji in postopki.</p>	<p>movement, deformation of solids and statics,</p> <ul style="list-style-type: none"> <li>• formulate boundary conditions for mathematical models,</li> <li>• evaluate and interpret obtained solutions and apply them to realistic systems.</li> </ul> <p><b>Transferable/Key Skills and other attributes:</b> Solution of physical and technical problems using the mathematical tools and methods.</p>
---	--

#### Metode poučevanja in učenja:

Predavanja (razlaga, razgovor, demonstracija) in eksperimentalna predavanja  
 Problemski pouk (postavitev problema, izbira potrebnih matematičnih orodij za reševanje, postavitev matematičnega modela, analitično in numerično reševanje, interpretacija dobljenih rešitev)  
 Seminarske vaje (metoda dela s tekstrom, metoda pisnih in grafičnih del, uporaba programskega orodja)  
 Projektno delo  
 Poučevanje in učenje potekata z didaktično uporabo informacijsko-komunikacijske tehnologije.

#### Learning and teaching methods:

Lectures (explanation, discussion, demonstration) and experimental lectures  
 Problem based learning (setting up physical problem, selection of appropriate mathematical tools, setting up a mathematical model, finding of an analytical or numerical solution, interpretation of obtained solutions)  
 Seminar work (work with text, work with graphic elements, use of computer tools)  
 Project work  
 Teaching and learning are done through the didactic use of ICT.

Delež (v %) /

Weight (in %)      **Assessment:**

Pisni izpit	<b>40</b>	Written exam
Ustni izpit	<b>40</b>	Oral exam
Projekt	<b>20</b>	Project

#### Opombe:

Pisni izpit se lahko nadomesti z dvema pisnima kolokvijema.

#### Comments:

Written exam can be replaced by two written midterm examinations.
