

UČNI NAČRT PREDMETA / COURSE SYLLABUS

| | |
|----------------------|-----------------------------------|
| Predmet: | Statistika v izobraževanju |
| Course title: | Statistics in education |

| Študijski program in stopnja Study programme and level | Študijska smer Study field | Letnik Academic year | Semester Semester |
|---|---|---------------------------------------|------------------------------------|
| Izobraževalna matematika – dvopredmetni, 1. stopnja | | 3. | 5. |
| Educational mathematics – Double-major, 1 st degree | | 3. | 5. |

Vrsta predmeta / Course type

Obvezni / Obligatory

Univerzitetna koda predmeta / University course code:

| Predavanja Lectures | Seminar Seminar | Sem. vaje Tutorial | Lab. vaje Laboratory work | Teren. vaje Field work | Samost. delo Individ. work | ECTS |
|--------------------------------------|----------------------------------|-------------------------------------|--|---|---|-------------|
| 30 | | | 15 | | 75 | 4 |

Nosilec predmeta / Lecturer:

Janja Jerebic

Jeziki /
Predavanja / Lectures:
 SLOVENSKO/SLOVENE

Languages:
Vaje / Tutorial:
 SLOVENSKO/SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:
Prerequisites:

Jih ni.

There are none.

Vsebina:

- Osnovni pojmi statistike: Statistična populacija in vzorec. Klasifikacija statističnih spremenljivk. Urejanje statističnih podatkov. Grafični in tabelarni prikazi statističnih podatkov.
- Opisna statistika. Populacijske in vzorčne mere osrednje tendenze in njihove karakteristike. Vrstilne karakteristike. Mere razpršenosti.
- Korelacija in regresija: Povezanost statističnih spremenljivk. Mere korelacije in korelačijski koeficienti. Pogojno matematično upanje. Regresijska premica. Metoda najmanjših kvadratov. Pojasnjena in nepojasnjena varianca.
- Vzorčne porazdelitve: Osnovni izrek matematične statistike. Porazdelitveni zakoni pomembnih vzorčnih statistik.

Content (Syllabus outline):

- Basic concepts of statistics: Statistical population and sample. Classification of statistical variables. Ordering statistical data. Graphical and tabular presentation of statistical data.
- Descriptive statistics: Population and sample measures of central tendency and their characteristics. Order statistics. Measures of variability.
- Correlation and regression. Relationships between statistical variables. Measures of correlation and correlation coefficients. Conditional mathematical expectation. The regression line. Method of least squares. Explained and unexplained variance.
- Sampling Distributions: The basic theorem of

Cilji in kompetence:

| | |
|--|---|
| <p>Glavni cilj predmeta je proučiti najpomembnejše koncepte, metode in rezultate statistike.</p> | <p>Objectives and competences:</p> <p>The main goal of the course is to study the fundamental concepts, methods and results of statistics.</p> |
|--|---|

Predvideni študijski rezultati:

| | |
|-------------------------------|--|
| <p>Znanje in razumevanje:</p> | <p>Knowledge and Understanding:</p> |
|-------------------------------|--|

- Razumevanje in poznavanje osnovnih pojmov in klasičnih metod statistične analize podatkov.
- Razumevanje in pravilna uporaba različnih statističnih testov.
- Obvladanje ustrezne programske opreme za namene statističnega raziskovanja.

Prenesljive/ključne spremnosti in drugi atributi:

- Prenos znanja iz statistike na različna strokovna in znanstvena področja, kjer se uporabljajo statistične analize podatkov

Objectives and competences:

The main goal of the course is to study the fundamental concepts, methods and results of statistics.

Intended learning outcomes:

| | |
|-------------------------------------|--|
| <p>Knowledge and Understanding:</p> | <p>Knowledge and Understanding:</p> |
|-------------------------------------|--|

- Understanding and knowledge of the basic concepts and classical methods of statistical data analysis.
- Understanding and correct application of different statistical tests.
- Knowledge of using appropriate software for statistical research.

Transferable/Key Skills and other attributes:

- Knowledge transfer of statistical methods into different areas dealing with data analysis

Metode poučevanja in učenja:

- | | |
|--|--|
| <ul style="list-style-type: none"> • Predavanja • Teoretične vaje • Laboratorijske vaje | <p>Learning and teaching methods:</p> <ul style="list-style-type: none"> • Lectures • Theoretical exercises • Laboratory exercises |
|--|--|

Načini ocenjevanja:**Assessment:**

| | | |
|---|---|---|
| Način (pisni izpit, ustno izpraševanje, naloge, projekt): <u>Izpit:</u> Pisni izpit – problemi Pisni izpit – teorija Vsaka izmed naštetih obveznosti mora biti opravljena s pozitivno oceno. Opravljen pisni izpit – problemi je pogoj za pristop k pisnemu izpitu – teorija. Pisni izpit – problemi se lahko nadomesti z dvema delnima testoma (sprotni obveznosti). | Delež (v %) / Weight (in %) 50 % 50 % | Type (examination, oral, coursework, project): <u>Exam:</u> Written exam – problems Written exam – theory Each of the mentioned assessments must be assessed with a passing grade. Passing grade of written exam – problems is required to take the written exam – theory. Written exam – problems can be replaced with two mid-term tests. |
