Cilji in kompetence:	**Objectives and competences:**
Študentje spoznajo aksiomatsko zasnovo evklidske geometrije ter osnove afine in projektivne geometrije.	Students get familiar with axiomatic approach to Euclidean geometry and the basic concepts of afffine and projective geometry.

Predvideni študijski rezultati:	**Intended learning outcomes:**
Znanje in razumevanje: • Razumevanje Hilbertovega aksiomatskega sistema za evklidsko geometrijo. • Poznavanje osnovnih pojmov afine in projektivne geometrije. Prenesljive/ključne spretnosti in drugi atributi: • Pridobljena znanja prispevajo k razumevanju ostalih predmetov s področja geometrije in topologije.	Knowledge and Understanding: • To understand the Hilbert axiomatic system for Euclidean geometry. • To recognize the basic concepts of affine and projective geometry Transferable/Key Skills and other attributes: • The obtained knowledge contributes to better understanding of other subjects in fields of geometry and topology.
