

UČNI NAČRT PREDMETA / COURSE SYLLABUS											
Predmet:	Številske množice in zaporedja										
Course title:	Number sets and sequences										
Študijski program in stopnja Study programme and level	Študijska smer Study field		Letnik Academic year	Semester Semester							
Matematika			1.	1.							
Mathematics			1.	1.							
Vrsta predmeta / Course type											
Univerzitetna koda predmeta / University course code:											
Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Laboratory work	Teren. vaje Field work	Samost. delo Individ. work	ECTS					
45		45			120	7					
Nosilec predmeta / Lecturer:	Boštjan BREŠAR										
Jeziki / Languages:	Predavanja / Lectures:	SLOVENSKO/SLOVENE									
	Vaje / Tutorial:	SLOVENSKO/SLOVENE									
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:										
Jih ni.	There are none.										
Vsebina:	Content (Syllabus outline):										
Osnovni matematični pojmi. Množice. Funkcije. Realna števila: aksiomi, supremum, maksimum; potence, koreni; iracionalna števila; intervali; absolutna vrednost. Kompleksna števila: osnovne lastnosti; polarni zapis. Zaporedja: konvergenca, operacije z zaporedji; monotona zaporedja, število e ;	Basic mathematical concepts. Sets. Functions. Real numbers: axioms, supremum, maximum; powers, roots; irrational numbers; intervals; absolute value. Complex numbers: basic properties; trigonometric form. Sequences: convergence, operations on sequences; monotone sequences, the number e ; subsequences, accumulation										

<p>podzaporedja, stekališča; Cauchyjeva zaporedja; potence z realnimi eksponenti.</p> <p>Vrste: konvergenca; geometrijska vrsta; vrste s pozitivnimi členi, kriteriji za konvergenco; alternirajoče vrste; absolutna in pogojna konvergenca; vsota in produkt vrst.</p>	<p>points; Cauchy sequences; powers with real exponents.</p> <p>Series: convergence; geometric series; series of positive terms, convergence criteria; alternating series; absolute and conditional convergence; addition and multiplication of series.</p>

Temeljni literatura in viri / Readings:

M. Dobovišek, M. Hladnik, M.Omladič, Rešene naloge iz analize, DMFA, Ljubljana, 1980.

J. M. Howie, Real analysis, Springer, 2001.

B. Hvala, Zbirka izpitnih nalog iz analize, DMFA, Ljubljana, 1996.

F. Morgan, Real analysis, AMS, 2005.

M. A. Robdera, A concise approach to mathematical analysis, Springer, 2003.

W. Rudin, Principles of mathematical analysis, McGraw Hill Book Co., 1976.

T. Tao, Analysis 1, 3rd edition, Hindustan Book Agency, New Delhi, 2014.

I. Vidav: Višja matematika I, Ljubljana, DZS, 1974.

Cilji in kompetence:

Obvladati teorijo realnih in kompleksnih števil ter zaporedij, vrst in njihovih lastnosti in ob tem usvojiti osnovne matematične koncepte

Objectives and competences:

Students learn the theory of real and complex numbers as well as sequences, series and their properties, and along the way acquire basic mathematical concepts.

Predvideni študijski rezultati:

Znanje, razumevanje ter uporaba:

- Številske množic.
- Zaporedij.
- Vrst.

Prenesljive/ključne spretnosti in drugi atributi:

- Spretnosti komuniciranja: pisno izražanje pri pisnem izpitu, ustni zagovor izpita.
- Pridobljena znanja so osnova za vse druge matematične predmete.

Intended learning outcomes:

Knowledge, understanding, and application of:

- Number sets.
- Sequences.
- Series.

Transferable/Key Skills and other attributes:

- Communication skills: writing skills at written exams, oral exam.
- The obtained knowledge forms a foundation for all the other mathematical courses.

Metode poučevanja in učenja:

- Predavanja
- Teoretične vaje

Learning and teaching methods:

- Lectures
- Theoretical exercises

Načini ocenjevanja:

Assessment:

Izpit:	Delež (v %) / Weight (in %)	Exam:
Pisni izpit – problemi Ustni izpit – teorija Vsaka izmed naštetih obveznosti mora biti opravljena s pozitivno oceno. Opravljen pisni izpit – problemi je pogoj za pristop k ustnemu izpitu – teorija. Pisni izpit – problemi se lahko nadomesti z dvema do tremi delnimi testi (sprotne obveznosti).	50% 50%	Written exam – problems Oral exam – theory Each of the mentioned assessments must be assessed with a passing grade. Passing grade of written exam – problems is required to take the oral exam – theory. Written exam – problems can be replaced with two to three mid-term tests.
