Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:
Prerequisites:

| Vsebina: | Content (Syllabus outline): |
|---|--|
| <ul style="list-style-type: none">- Glavne značilnosti živih bitij- Prokarioti, evkarioti. Avtotrofija, heterotrofija. Enoceličarji, nepravi in pravi mnogoceličarji- Organizacijske stopnje živali- Značilnosti živalske celice- Osnovni tipi živalskih tkiv- Osnovne zarodne plasti evmetazojev- Organski sistemi evmetazojev: integument, ogrodje, gibala, prebavila, dihala, organi za transport snovi, izločala, čutila, živčevje, endokrini sistem, reproduktivni sistem. | <ul style="list-style-type: none">- The main characteristics of living beings- Prokaryotes, eukaryotes. Autotrophy, heterotrophy. Protista, Porifera and Eumetazoa- Organizational levels of animals- Characteristics of animal cell- Basic types of animal tissues- Primary germ layers of the eumetazoans- Organ systems of the evmetazoans: integumentary system, skeletal system, motion organs, digestion organs, respiratory organs, circulatory systems, excretory systems, sense organs, nervous |

- Različni načini nespolnega in spolnega razmnoževanja.

- system, endocrine system, reproductive system
- Reproduction: different methods of asexual and sexual reproduction.

Temeljni literatura in viri / Readings:

Hickman, C. P. Jr., Roberts, L. S., Keen, Susan L., Eisenhour, D. J., Larson, A., l'Anson, H., 2014: Integrated Principles of Zoology. McGraw Hill. New York.

Štrus, J., 1999: Splošna zoologija. Študentska založba, Ljubljana.

Miller, S. A., Harley, J. P., 2010: Zoology. McGraw-Hill Higher education, Boston, USA.

Klenovšek, T., Lipovšek Delakorda, S., 2013: Splošna zoologija : kompendij z navodili za vaje za študijski program Izobraževalna biologija. Maribor: Fakulteta za naravoslovje in matematiko, Oddelek za biologijo.

Cilji in kompetence:

- Predstaviti glavne značilnosti živih bitij in njihov nastanek
- Predstaviti osnovne organizacijske tipe živali.
- Predstaviti osnovne tipe tkiv evmetazojev
- Predstaviti osnovno zgradbo, funkcijo ter raznolikost organov in organskih sistemov evmetazojev od nevretenčarjev do človeka
- Predstavitev in učenje metod dela: opazovanje, risanje preparatov, mikroskopija, sekcija.

Objectives and competences:

- To present the main characteristics of living beings and their evolution.
- To present basic organizational types of animals
- To present the basic types of tissues in eumetazoans.
- To present the basic structure, function and diversity of organs and organ systems of eumetazoans from invertebrates to the human.
- Presentation and correct use of methods: observation, drawing, microscopy, section.

Predvideni študijski rezultati:

Znanje in razumevanje:

- Razumevanje temeljev zoološke vede in osnovnih pojmov v zoologiji
- Razumevanje osnov življenja, evolucije in značilnosti živih bitij
- Poznavanje kompleksnosti organizacijskih oblik in osnovnih živalskih skupin
- Poznavanje osnovnih tipov tkiv, zgradbe in funkcije organov in organskih sistemov evmetazojev od nevretenčarjev do človeka
- Poznavanje in učinkovita ter pravilna uporaba nekaterih metod dela v zoologiji

Prenesljive/ključne spretnosti in drugi atributi:

- Sposobnost prepoznavanja osnovnih organizacijskih tipov živali, zgradbe in funkcije živalskih tkiv, organov in organskih sistemov
- Sposobnost načrtovanja in izvedbe preprostega opazovanja ter sekcije živali ali organa
- Sposobnost mikroskopiranja in interpretacije živalskih tkivnih preparatov

Intended learning outcomes:

Knowledge and understanding:

- Understanding of the fundamentals of the zoological science and its terminology.
- Understanding the basics of life, evolution and the main characteristics of living beings.
- Knowledge of the complexity of organizational types and groups of animals.
- Knowledge of the basic types of tissues, structure and function of organs and organ systems of eumetazoans from invertebrates to humans.
- Knowledge of some methods in zoology

Transferable / Key Skills and other attributes:

- Ability to recognize the basic organizational types of animals, the structure and function of animal tissues, organs and organ systems.
- Ability to arrange a simple observations or section of an animal or its organ.
- Ability of the correct use of the light microscope and the interpretation of animal tissue
