#### Cilji in kompetence:

- Študentje razlikujejo različne molekularne metode
- Študentje primerjajo različne genetske mutacije na rastlinah
- Študentje uporabljajo različne molekularne metode v botaniki
- Študentje povezujejo molekularno znanje z naravovarstvenim

#### Objectives and competences:

- Students compare different molecular methods
- Students compare different gene mutations for plants
- Students use different molecular method in botany
- Students connect molecular knowledge with natural conservation

**Predvideni študijski rezultati:****Znanje in razumevanje:**

- Študentje uporabljajo in analizirajo različne molekularne metode v botaniki
- Študentje konstruirajo poskuse na molekularnem nivoju
- Študentje so sposobni prepozнатi genske mutacije za rastline
- Študentje aplicirajo molekularno znanje na naravovarstveno problematiko

**Prenesljive/ključne spretnosti in drugi atributi:**

- Študentje poznajo molekularne metode v botaniki

**Intended learning outcomes:****Knowledge and understanding:**

- Students use and analyze various molecular method in botany
- Students construct their own experiment on molecular level
- Student are able to recognize gene mutations for plants
- Students apply molecular knowledge to nature conservation issues

**Transferable/Key Skills and other attributes:**

- students know molecular method in botany

**Metode poučevanja in učenja:**

- Predavanja
- Seminarji
- Laboratorijske vaje

**Learning and teaching methods:**

- Lectures
- Seminars
- Laboratory exercises
