

Univerza v Mariboru

Fakulteta za naravoslovje
in matematiko

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	EVOLUCIJA
Course title:	EVOLUTION

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Enoviti pedagoški magistrski program druge stopnje Predmetni učitelj	Izobraževalna biologija	5	9
Five-year master's degree program Subject Teacher	Educational Biology	5	9

Vrsta predmeta / Course type:

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
30					60	3

Nosilec predmeta / Lecturer:

Jeziki / Languages:	Predavanja /	slovenski
	Lectures:	Slovenian
	Vaje / Tutorial:	slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

<p>I. Evolucija kot znanost</p> <ul style="list-style-type: none">• položaj evolucije v kontekstu naravoslovnih, družbenih in humanističnih znanosti;• zgodovinski razvoj evolucijske misli;• sodobni pogledi na proces evolucije; <p>II. Izvor živega</p> <ul style="list-style-type: none">• prebiotska evolucija;• teorije o nastanku živega;• veliki evolucijski prehodi;• kraljestva in domene živega; <p>III. Orodja evolucijskega biologa</p>
--

Content (Syllabus outline):

<p>I. Evolution as science</p> <ul style="list-style-type: none">• evolution in the context of sciences, social sciences and humanities;• history of evolutionary thinking;• recent views on evolution; <p>II. Emergence of life</p> <ul style="list-style-type: none">• prebiotic evolution;• theories on development of life;• major evolutionary transitions;• kingdoms and domains of life; <p>III. Tools of evolutionary biologist</p>

- paleontološki izkazi (fosili, posledice delovanja);
- datacija najdb;
- primerjalne študije (anatomske, histološke, embriološke, biokemijske, genetske);
- genske analize;
- kladistične analize;
- IV. Izvori genske pestrosti**
- razmerje med genomom, genotipom in fenotipom;
- mutacije;
- genske rekombinacije;
- horizontalni genski transfer;
- epigenetsko dedovanje;
- populacijska genetika;
- V. Selekcija**
- dejavniki selekcije;
- prijemališča selekcije;
- strategije preživetja;
- primeri adaptacij na okolje;
- koevolucija;
- VI. Speciacija in razvoj višjih taksonov**
- opredelitev koncepta vrste (biološka, morfološka, kronološka);
- reproduktivna izolacija;
- speciacija (alopatrična, simpatrična, parapatrična);
- razvoj višjih taksonov;
- izumrtje taksona;
- VII. Humana evolucija**
- izvor in evolucija primatov;
- evolucija primatskih znakov;
- povezava med biološko in kulturno evolucijo;
- filogenija in sistematika recentnih družin primatov;
- filogenija, sistematika in biogeografija predhodnikov in sodobnikov rodu *Homo* (*Ardipithecus*, *Paranthropus*, *Australopithecus*, itd.);
- filogenija, sistematika in biogeografija rodu *Homo*;
- izvor, filogenija, sistematika in biogeografija vrste *Homo sapiens*;
- razvoj človeških kultur;
- najdbe v Sloveniji;
- evolucijske perspektive vrste *H. sapiens*.

- paleontology (fossils, traces of biological activities);
- datation;
- comparative studies (anatomy, histology, embryology, biochemistry, genetics);
- gen analyses;
- cladistic analyses
- IV. Sources of genetical variability**
- relations between genome, genotype and phenotype;
- mutations;
- genetic recombinations;
- horizontal gene transfer;
- epigenetic inheritance;
- population genetics
- V. Selection**
- factors of selection;
- targets of selection;
- survival strategies;
- adaptations;
- coevolution;
- VI. Speciation and evolution of higher taxa**
- species concept (biological, morphological, chronological);
- reproductive isolation;
- speciation (allopatric, sympatric, parapatric);
- development of higher taxa;
- extinction of taxa;
- VII. Human evolution**
- evolution of primates;
- evolution of traits in primates;
- connections between biological and cultural evolution;
- phylogeny, systematics and biogeography of recent primate families;
- phylogeny, systematics and biogeography of human precedesors and side branches of the human evolutionary line (*Ardipithecus*, *Paranthropus*, *Australopithecus*, *Paranthropus*, etc.);
- phylogeny, systematics and biogeography of the genus *Homo*;
- phylogeny, systematics and biogeography of the species *Homo sapiens*;
- evolution of culture;
- Slovenian findings;
- evolutionary perspectives of *H. sapiens*.

Temeljni literatura in viri / Readings:

Jablonka, E., & Lamb, M. J. (2009). Štiri razsežnosti evolucije: genetska, epigenetska, vedenjska in simbolna raznolikost v zgodovini življenja (1. izd., str. VIII, 443). Zavod Republike Slovenije za šolstvo.

Liem, K. F., Bemis, W. E., Walker, W. F., & Grande, L. (2001). Functional anatomy of the vertebrates: an evolutionary perspective (3rd ed., str. XVII, 703, G-31.). Harcourt College Publishers.

Mayr, E. (2008). Filozofija evolucije (str. LI, 366). Fakulteta za družbene vede.

McGrew, W. C. (2011). Kulturni šimpanz: razmišljanja o kulturni primatologiji (str. 401). Studia Humanitatis.

Dodatna literatura:

Futuyma, D. J., & Kirkpatrick, M. (2023) Evolution (5th ed., str XVI, 615, 70). Oxford University Press.

The Oxford handbook of evolution, biology, and society (str. XVII, 681). (2018) Oxford University Press.

Where did we come from?: current views on human evolution (str. 170). (2010). Faculty of Education.

Cilji in kompetence:

- Razumevanje mehanizmov biotske evolucije,
- pridobivanje znanj o izvoru in razvoju živega na osnovi spoznanj naravoslovnih znanosti,
- prepoznavanje evlucijskih procesov v kontekstu drugih bioloških disciplin,
- prepoznavanje in utemeljevanje biotske in kulturne evolucije,
- umeščanje človeka v biološki sistem in
- opredeljevanje človeka kot biotsko in kulturno bitje.

Objectives and competences:

- Understanding of mechanisms of biotic evolution,
- gaining knowledge about the origin and evolution of life based on the natural sciences,
- recognition of evolutionary processes in the context of other biological disciplines,
- recognition and foundation of biotic and cultural evolution,
- classification of the human being into a biological system and
- definition of human as a biological and cultural being.

Predvideni študijski rezultati:

Študenti poznajo odnos med znanostjo in drugimi družbenih vednosti. Pojasnijo procese nastanka in razvoja neživega in živega. Naštejejo različna orodja evlucijskega biologa in njihovo uporabo. Znajo pojasniti vzroke raznolikosti živih bitij, mehanizme selekcije, speciacije in razvoja višjih taksonov. Pridobijo poglobljeno znanje o kozmogoniji, kemoevoluciji, biotski in humani evoluciji, kar jim omogoča vključevanje v razprave o evlucijskih tematikah.

Intended learning outcomes:

Students know the relationship between science and other social disciplines. They explain processes of origin and evolution of non-living and living things. They list different tools of an evolutionary biologist and their applications. Students are able to explain the sources of diversity of living beings, mechanisms of selection, speciation and development of higher taxa. They acquire detailed knowledge of cosmogony, chemoevolution, biotic and human evolution, which enables them to participate in discussions about evolution.

Metode poučevanja in učenja:

Predavanja
Samostojno kritično preučevanje literature

Learning and teaching methods:

Lectures
Individual critical reading of the written sources.

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

Pisni izpit

100 %

Written exam
