Temeljni literatura in viri / Readings:

Osnovni viri:

- Uradni list Republike Slovenije in Evropske unije
- Druga relevantna literatura s področja kompetenc v poučevanju: veljavna zakonodaja s področja osnovnega in srednjega šolstva, uredbe in podzakonski akti
- Učni načrti, pravilniki, priročniki, učbeniki, delovni zvezki, e-gradiva in drugi didaktični dokumenti
- Spletne mesta dostopa do relevantnih dokumentov s področja kompetenc
- Rezultati projekta Razvoj naravoslovnih kompetenc <http://kompetence.uni-mb.si>

Cilji in kompetence:

Cilj predmeta je, da študenti prepoznajo pomen poučevanja fizike v osnovni in srednji šoli, osredotočen na razvoj kompetenc. Vedo, kaj so kompetence, poznajo tudi različne vrste kompetenc. Znajo poiskati relevantne vire o kompetencah ter primerjati različne nabore kompetenc med seboj po v naprej znanih kriterijih. Razvijejo sposobnost kritičnega presojanja različnih pojmovanih kompetenc doma in v tujini, še posebej glede odprtosti/zaprtosti diktije kompetence in posledice le-tega. Usposobijo se za samostojno pripravo eksperimentalnih in teoretično-računskih didaktičnih gradiv za razvoj izbrane kompetence. Razvijejo sposobnost strokovnega raziskovalnega dela ter pisnega in ustnega poročanja o svojem individualnem delu.

Objectives and competences:

The objective of this course is for students to learn the significance of teaching physics in primary and secondary school, focused on the development of competences. Students should know what competences are and know different types of competences. They should also learn how to find the appropriate literature and compare different sets of competences under given criteria. Students should also be able to critically assess different understandings of competences in Slovenia and other countries especially openness/closeness of definition of competences and its consequences. During the course students will be prepared for individual preparation and conduct of an experiment and preparation of theoretical didactic material for development of a chosen competence. They will also develop skills in scientific research and written and oral presentation of their individual work.

Predvideni študijski rezultati:**Intended learning outcomes:**

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- poiskati relevantne vire o kompetencah ter primerjati različne nabore kompetenc med seboj po v naprej znanih kriterijih
- kritičnega presojanja različnih pojmovanj kompetenc doma in v tujini, še posebej glede odprtosti/zaprtosti diktije kompetence in posledice le-tega,
- samostojne priprave eksperimentalnih in teoretično-računskih didaktičnih gradiv za razvoj izbrane kompetence
- samostojno strokovno raziskovati na področju kompetenc ter o svojih izsledkih pisno in ustno poročati.

Prenesljive/ključne spremnosti in drugi atributi:

- Spremnosti komuniciranja: pisno izražanje pri pripravi portfolia o izvedenih aktivnostih na področju kompetenc ter osvojene veščine javnega nastopanja ob predstavitvi portfolia.
- Uporaba informacijske tehnologije: uporaba računalnika in elektronskih informacijskih virov pri iskanju literature in relevantnih informacij.
- Reševanje problemov: organiziranje in izvedba raziskave (analiza in primerjava različnih naborov kompetenc doma in v tujini).

Metode poučevanja in učenja:

- Predavanja
- Seminarske vaje

Knowledge and understanding:

On completion of this course the student will be able to

- search for relevant literature on competences and compare different sets of competences under different criteria
- critically assess different understandings of competences in Slovenia and other countries, especially in regard to openness/closeness of diction and its consequences
- individually prepare experimental and theoretical didactic material for a chosen competence
- individually do scientific research in the field of competences and report in writing or orally about their results

Transferable/Key Skills and other attributes:

- Communication skills: writing skills when preparing portfolio about conducted activities in the field of competences and public performance skills when presenting the portfolio
- Use of information technology: use of computer and on-line information sources when searching for literature and relevant information.
- Problem solving: organisation and conduct of research (analysis and comparison of different sets of competences in Slovenia and other countries)

Learning and teaching methods:

- Lectures
- Seminar work

Delež (v %) /
