in matematiko

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Fizikalni eksperimenti 3
Course title:	Physics experiments 3

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Enovit magistrski študijski program druge stopnje Predmetni učitelj	Izobraževalna fizika	2	4
Five-year master's degree program Subject Teacher	Educational physics		

Vrsta predmeta / Course type

Obvezni/Compulsory

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
			40		50	3

Nosilec predmeta / Lecturer:

Robert Repnik

Jeziki / Predavanja / Lectures:

slovenski/Slovenian

Languages:

Vaje / Tutorial:

slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Pogojev ni.

Prerequisites:

None.

Priporočljivo predznanje iz klasične fizike, predvsem iz nihanja, valovanja in optike.

Recommended preknowledge of classical physics, especially of oscillations, waves and optics.

Vsebina:

Predavanja

teoretični pregled zahtevnejših vsebin laboratorijskih vaj in uporabljenih merilnih tehnik.

Laboratorijske vaje

Študent opravi eksperimente s področja nihanja in valovanja ter valovne in geometrijske optike. Laboratorijske vaje so iz naslednjih vsebin: dušeno in nedušeno nihanje, vsiljeno nihanje in resonanca, električni nihajni krog, potujoče in stoječe valovanje, leče in zrcala, lečja, uklon in interferenca, spektroskopija, sevanje črnega telesa.

Projektno delo

Študent pripravi projektno nalogo: načrtuje in izdela meritve, pripravi navodila za izvajanje meritve, izvede meritve in napiše poročilo.e.

Seminar

Predstavitve projektne dela.

Content (Syllabus outline):

Lectures

theoretical overview of the demanding experiments and used measuring techniques.

Laboratory work

Student performs experiments from oscillations and waves and from wave and geometrical optics. Experiments are from the following topics: undamped and damped oscillations, forced oscillations and resonance, electrical oscillation circuit, travelling and standing waves, lenses and mirrors, systems of lenses, diffraction and interference, spectroscopy, blackbody radiation.

Project work

Each student works on a project. The work involves planning the experiment, building the experiment, performing the measurements and writing report.

Seminar

Oral presentation of project work.

Temeljni literatura in viri / Readings:

- 1) Navodila za izvedbo vaj/ Guidelines for the experiments
- 2) Sirkevič, Koškin: Priročnik elementarne fizike. Ljubljana: TZS, 1988.
- 3) D. Halliday, R. Resnick, K. S. Krane, Physics, 5. izdaja, vol 1 in 2 (John Wiley & Sons, Inc., New York, 2002).
- 4) J. Strnad, Fizika, 1. in 2. del, (DMFA, Ljubljana, 2002).
- 5) Na spletnih straneh Oddelka za fiziko objavljena elektronska gradiva./ teaching material published on websites of Department of Physics.

Cilji in kompetence:

Cilj tega predmeta je, da študentje usvojijo temeljna znanja o merilnih tehnikah in metodah na področju nihanja, valovanja in optike. Študentje se usposobijo za samostojno reševanje

Objectives and competences:

The objective of this course is for students to acquire basic knowledge in measuring techniques and methods used in oscillations, waves and optics. Students are competent to find appropriate

zahtevnejših problemov s področja nihanja, valovanja in optike, pri čemer znajo predlagati, izdelati ter izvesti ustrezen fizikalni eksperiment. Na osnovi eksperimentalno pridobljenih podatkov, v kombinaciji z ustreznim teoretičnim znanjem iz nihanja, valovanja in optike in drugimi informacijskimi viri ter računalniškimi simulacijskimi okolji so sposobni smiselno oblikovati končno rešitev problema.

solutions of advanced problems in oscillations, waves and optics. They are able to propose, prepare and perform appropriate physical experiments and on the basis of experimentally obtained data combined with their theoretical knowledge in oscillations, waves and optics as well as professional literature and computer simulation tools reasonably formulate the final solution of the problem.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po uspešno zaključeni učni enoti je študent zmožen:

- uporabiti znanje s področja nihanja in valovanja ter optike,
- aplicirati teoretična znanja o merilnih tehnikah,
- uporabiti ustrezne metode za obdelavo in analizo podatkov,
- vrednotiti in interpretirati rezultate ter jih povezati s teorijo,
- precizno in adekvatno poročati o svojih eksperimentalnih ugotovitvah.

Prenesljive/ključne spretnosti in drugi atributi:

Študent:

- pridobi laboratorijske spretnosti potrebne za samostojno delo pri demonstracijah in eksperimentalnih vajah s področja nihanja, valovanja in optike,
- se priuči rokovanja z merilnimi napravami in laboratorijsko opremo,
- prepozna možne vire nevarnosti pri eksperimentalnem delu in pozna postopke za varno delo v laboratoriju,
- usvoji znanje potrebno za pripravo kvantitativnega in kvalitativnega eksperimenta s področja nihanja, valovanja in optike,

Intended learning outcomes:

Knowledge and understanding:

On completion of this course students will be able to:

- use the knowledge from oscillations and waves and optics to execute laboratory work,
- apply the knowledge of measuring techniques,
- use appropriate methods for processing and analyzing data,
- evaluate and interpret results and connect them with theory,

accurate and adequate reporting on their experimental work.

Transferable/Key Skills and other attributes:

Student:

- acquires experiences and laboratory skills that are essential for an autonomous execution of demonstrative physics experiments in the field of oscillations, wave and optics,
- gains ability of handling with measuring devices and laboratory equipment,
- recognizes potential dangers in experimental work and knows procedures for safe laboratory work,
- gains knowledge needed to produce quantitative and qualitative experiments,
- gets acquainted with searching and sorting information sources and efficient use of sources,

- se seznanjajo z iskanjem, sortiranjem in ustrezno rabo virov,
- pridobijo spretnosti uporabe programskih orodij za analizo podatkov eksperimentov s področja nihanja, valovanja in optike,
- je zmožen presoje smiselnosti uporabe približkov,
- je sposoben sodelovalnega učenja,
- razvija spretnost samostojnega in skupinskega strokovnega in raziskovalnega dela,
- spozna didaktične pristope pri obravnavi naravnih pojavov ter pridobi sposobnost prenesti znanje laiku.

- acquires skills to use software tools for analyzing data from experiments in the field of oscillation, wave and optics,
- is capable to judge the effective use of approximations.
- is capable of collaborative learning,
- develops skills of individual and group professional-research work.
- gets acquainted with didactic approaches to study to real-life phenomena and the ability to transfer this knowledge to a non-specialist.

Metode poučevanja in učenja:

- predavanja (razlaga, razgovor, demonstracija)
- laboratorijske vaje (metoda dela s tekstom, pisnih in grafičnih del, metoda praktičnih del, uporaba simulacij in programskih orodij za obdelavo podatkov, sodelovalno učenje, diskusija rezultatov)
- projektno delo (individualizacija poučevanja)
- seminar (razlaga, razgovor)
- elementi obrnjenega poučevanja

Learning and teaching methods:

- lectures (explanation, discussion, demonstration)
- laboratory exercises (work with text, work with graphic elements, practical work, use of simulations and software tools for data processing, collaborative learning, discussion of results)
- project work (individualization in teaching)
- seminar work (explanation, discussion)
- elements of flipped learning

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

Način (pisni izpit, ustno izpraševanje, naloge, projekt):	Weight (in %)	Type (examination, oral, coursework, project):
Opravljene vse laboratorijske vaje, izdelan dnevnik vaj in ustni zagovor vaj	20	All experiments done, done laboratory report and the oral avocation of experiments
Ustno in pisno preverjanje pripravljenosti na vajo	20	Oral and written assessment of readiness for the forthcoming experiment
Pisni kolokvij	20	Written test
Projekt (izdelek in predstavitev)	20	Written test

<p>Ustni izpit</p> <p>Vsaka izmed naštetih obveznosti mora biti opravljena s pozitivno oceno.</p> <p>Pozitivno ocenjeno poročilo laboratorijskih vaj z zagovorom, pozitivno ocenjeno preverjanje pripravljenosti na vaji, pozitivna ocena pri pisnem kolokviju in pozitivna ocena projektne naloge so pogoji za pristop k ustnemu izpitu.</p>	<p>20</p>	<p>Project (work and presentation)</p> <p>Oral exam</p> <p>Each of the mentioned commitments must be assessed with a passing grade.</p> <p>Positive grade of laboratory report and advocacy, positive grade of readiness assessment, positive grade of test and positive grade of project are a prerequisite for access to oral examination.</p>
