

UČNI NAČRT PREDMETA / COURSE SYLLABUS
Predmet: Izbrana poglavja iz analize

Course title: Selected topics in Analysis

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Enovit magistrski študijski program druge stopnje Predmetni učitelj	/	3.	5.
Five-year master's degree program Subject Teacher	/		

Vrsta predmeta / Course type

Obvezni / Obligatory

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Laboratory work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
45		30			105	6

Nosilec predmeta / Lecturer:

Marko Jakovac

**Jeziki /
Languages:**
Predavanja / Lectures:

Slovenski / Slovenian

Vaje / Tutorial:

Slovenski / Slovenian

**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

Jih ni.

There are none.

Vsebina:

Funkcije več realnih spremenljivk. Zveznost, parcialna odvedljivost. Višji parcialni odvodi. Taylorjeva formula. Lokalni in globalni ekstremi. Vezani ekstremi.

Ploščina, volumen, dvojni, trojni integral. Polarne,

Prerequisites:

Functions of several real variables. Partial derivatives, higher derivatives. Taylor's formula. Local and absolute extrema. Lagrange multipliers.

Area, volume. Double and triple integrals. Polar,

Content (Syllabus outline):

cilindrične in sferne koordinate. Integral s parametrom.

Krivulje in ploskve. Parametrizacija. Tangenta, tangentna ravnina. Dolžina krivulje, ploščina ploskve. Primeri.

cylindrical and spherical coordinates. Parameter-dependent integral.

Curves and surfaces. Parametrization. Tangent. Arc length, surface area. Examples.

Temeljni literatura in viri / Readings:

- F. in B. Brešar: *Analiza II*, Maribor: Feri, 2005
- F. in B. Brešar: *Analiza III*, Maribor: Feri, 2005
- G.F. Simmons, J.S. Robertson: *Differential equations with applications and historical notes*, New York: McGraw Hill, 1991.
- M. H. Protter, C. B. Morrey: *Intermediate calculus*. New York : Springer, 1985

Cilji in kompetence:

Student se seznani s tistimi poglavji matematične analize funkcij več spremenljivk, ki so najbolj aktualna pri opisu situacij in reševanju problemov z različnih področij matematike, naravoslovje in širše.

Objectives and competences:

Student get insight in those chapters of the theory of functions of more variables that provide the most illustrative examples of applications of the theory to the description and solving problems in different areas of mathematics, sciences and wider.

Predvideni študijski rezultati:

- Študent spozna osnovna dejstva o funkcijah več spremenljivk in njihovi uporabi, predvsem pri ekstremalnih problemih.
- Seznani se z integracijo funkcij po merljivih množicah v prostoru.
- Izve najosnovnejše o krivuljah in ploskvah.

Intended learning outcomes:

- Knowing basic facts about functions of several variables and being aware of the possible applications of this theory, specially in solving extemal problems.
- Knowing concepts of integration on measurable subsets of plane and space.
- Knowing the basic facts about curves and surfaces.

Prenesljive/ključne spretnosti in drugi atributi:

- Ilustracija dejstva, da nam teorija, navidez oddaljene od realnosti, lahko ponudi mnoge praktično uporabne rezultate.

Transferable/Key Skills and other attributes:

- An illustration of the fact, that a more abstract theory can give us many nice results with useful practical applications.

Metode poučevanja in učenja:

- Predavanja
- Teoretične vaje

Learning and teaching methods:

- Lectures
- Theoretical exercises

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

Izpit:

Pisni izpit – problemi

50%

Exams:

Written exam – problems

Ustni izpit – teorija Vsaka izmed naštetih obveznosti mora biti opravljena s pozitivno oceno. Opravljen pisni izpit – problemi je pogoj za pristop k ustnemu izpitu – teorija.	50%	Oral exam – theory Each of the mentioned assessments must be assessed with a passing grade. Passing grade of written exam – problems is required to take the oral exam – theory.
