**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

--	--

Vsebina:

- Uvod: vloga operacijskega sistema (OS) ter njegove temeljne funkcije, zgradba računalniških sistemov in OS, delo s prekinitvami in z vhodni-izhodnimi napravami.
- Upravljanje s posli in procesi: posel in njegovo izvrševanje, zgradba in stanja procesa, procesov nadzorni blok, niti, komunikacija med procesi.

Content (Syllabus outline):

- Introduction: role of operating systems (OS) and their basic functionality, computer systems and OS architectures, interrupt handling and access to input/output devices.
- Job and process management: jobs and their scheduling, process structure and states, process control block, threads, process communication.

- | | |
|---|--|
| <ul style="list-style-type: none"> • Razvrščanje procesov: kriteriji za razvrščanje, razvrščevalni algoritmi (kdor prej pride, prej melje, najkrajši posli najprej, prioriteta, krožna prioriteta, več aktivnih vrst). • Upravljanje s posli: dvonivojsko in trinivojsko razvrščanje poslov, izločanje procesov. • Sinhronizacija med procesi: kritični odsek, Petersonova rešitev za sinhronizacijo med dvema procesoma, pekarniški algoritem, strojni pripomočki za sinhronizacijo, semafor, monitor, problem popolnega zastoja in pomanjkanja. • Klasični problemi sinhronizacije: proizvajalec in potrošnik, pisci in bralci, filozofi pri kosilu, speči brivec. • Upravljanje s pomnilnikom: particije, ostranjevanje, izvedbe tabel strani, asociativni pomnilnik, segmentiranje, segmentiranje z ostranjevanjem, efektivni dostopni časi. • Virtualni pomnilnik: postopki nalaganja in zamenjave strani, napaka strani, algoritmi za zamenjavo strani in efektivni dostopni časi (kdor prej pride, prej melje, optimalni, najdlje neuporabljeni, števni). • Upravljanje z zbirčnim sistemom: kazala in njihova izvedba (večnivojska, drevesna, aciklični grafi), funkcije OS pri delu z zbirkami in kazali, sloji zbirčnega sistema. • Izvedbe zbirčnega sistema: fizični zapisi zbirk v obliki sklenjenega zapisa, kazalčnega seznama in indeksne namestitve, NTFS. • Razvrščanje zahtev za disk: algoritmi (kdor prej pride, prej melje, prebirni, ciklični prebirni, multimedijiški), upravljanje s prostim diskovnim prostorom in z odlagalnim prostorom. | <ul style="list-style-type: none"> • Process scheduling: scheduling criteria, scheduling algorithms (first-come first-served, shortest-job-first, priority, round-robin, several active queues). • Job management: two- and three-level scheduling, process suspension. • Process synchronisation: critical section, Peterson's solution for synchronisation of two processes, bakery algorithm, hardware for synchronisation, semaphore, monitor, the problem of deadlock and starvation. • Classical problems of synchronisation: producer-consumer, readers and writers, dining philosophers, sleeping barber. • Memory management: partitions, paging, page table design, associative registers, segmentation, segmentation with paging, effective access times. • Virtual memory: loading and replacement algorithms, page fault, page replacement algorithms and effective access times (first-come first-served, optimal, least-recently-used, counting). • File system management: directories and their implementation (multilevel, tree, acyclic graphs), functions of OS to handle files and directories, levels of file system. • Implementation of file systems: physical allocation of files as contiguous, list of pointers and indexing, NTFS. • Disk scheduling: algorithms (first-come first-served, scan, cyclic scan, multimedia), disk free-space and swap-space management. |

Cilji in kompetence:

Predmet podaja temeljna znanja o zasnovi in delovanju operacijskih sistemov.

Objectives and competences:

This course gives basic knowledge of operating systems design and algorithms.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- razumeti glavne principe načrtovanja in delovanja operacijskih sistemov,
- analizirati in pouporabiti algoritme za razvrščanje in sinhronizacijo procesov ter za upravljanje s pomnilnikom in zbirčnimi sistemi,
- optimalno namestiti operacijski sistem in uporabljati njegove funkcije.

Prenosljive/ključne spremnosti in drugi atributi:

- *Spremnosti komuniciranja:* ustni zagovor laboratorijskih vaj, priprava in javna predstavitev poročila o študentskem projektu, ustni izpit.
- *Uporaba informacijske tehnologije:* delo z različnimi operacijskimi sistemi, pisanje krajših sistemskih programov.
- *Delo v skupini:* skupinsko delo v študentskem projektu.
- *Reševanje problemov:* načrtovanje in izvedba študentskega projekta, sodelovanje z industrijskimi partnerji.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- understand the basic principles of the operating systems design and operation,
- analyse and re-implement the algorithms for process scheduling and synchronisation, and for memory and file-system management,
- install and set-up the operating system and use its functions.

Transferable/Key skills and other attributes:

- *Communication skills:* oral lab work defence, preparation and presentation of the student project report, oral examination.
- *Use of information technology:* use of different operating systems, implementation of plain system programs.
- *Team work:* team execution of student projects.
- *Problem solving:* designing and implementing of student projects, co-operation with industrial partners.

Metode poučevanja in učenja:

- predavanja,
- seminarske vaje,
- laboratorijske vaje,
- seminar,
- reševanje domačih nalog.

Learning and teaching methods:

- lectures,
- tutorials,
- lab work,
- tutorial,
- homework assignments.

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
<ul style="list-style-type: none"> • opravljene domače naloge, • laboratorijske vaje, • opravljeno seminarsko delo, • 1. vmesni pisni izpit, • 2. vmesni pisni izpit, • 3. vmesni pisni izpit. 	15 % 35 % 15 % 11 % 12 % 12 %	<ul style="list-style-type: none"> • completed homework, • lab work, • completed seminar work, • 1st midterm written exam, • 2nd midterm written exam, • 3rd midterm written exam.

Opomba: Če študent ni uspešno opravil vseh treh vmesnih pisnih izpitov, jih nadomesti z ustnim izpitom v deležu 35%.

Note: If a student has not completed all three midterm written exams, he replaces them with an oral exam in the weight of 35%.
