UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	**Matematična fizika v izobraževanju**
Course title:	**Mathematical Physics in education**

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Dvopredmetna izobraževalna fizika	**/**	**2**	**3**
Double major Educational Physics	**/**		

Vrsta predmeta / Course type	Izbirni / Elective
Univerzitetna koda predmeta / University course code:	

Predavanja Lectures	Seminar Seminar	Seminarske vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
45		**30**			**75**	**5**

Nosilec predmeta / Lecturer:	Mitja Slavinec

Jeziki / Languages:	**Predavanja / Lectures:**	slovensko / Slovene
	Vaje / Tutorial:	slovensko / Slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	**Prerequisits:**
Predznanje na področjih matematične analize, algebre, mehanike, elektromagnetizma.	Preknowledge in the field of mathematical analysis, algebra, mechanics, electromagnetism.

Vsebina:	**Content (Syllabus outline):**
1.) Funkcije ene in več spremenljivk Posebne funkcije (trigonometrična, eksponentna, logaritemska, hiperbolična), polinomi, lastnosti in grafi funkcij, funkcije kompleksne spremenljivke. 2.) Odvod in integral. Hitrost, pospešek, moč, iskanje ekstremov, integriranje in določeni integral (delo, pot, energija), parcialni odvodi, klasifikacija ekstremov funkcij dveh spremenljivk, dvojni in trojni integral (masa, težišče, vztrajnostni moment), računanje z diferenciali, Taylorjeva vrsta. 3.) Matrike in tenzorji	1) Functions of one and multiple variables Special functions (trigonometric, exponential, logarithmical, hyperbolic), polynomial, function properties and graphs functions of complex variable. 2) Derivative and integral Velocity, acceleration, power, searching of extrema, integration and definite integral (work, path, energy), partial derivatives , classification of extremes of functions of two variables, double and triple integral (mass, centre of gravity, moment of inertia), calculus with differentials, Taylor series. 3) Matrices and tensors

Vektorska in tenzorska algebra, determinanta, inverzne matrike, kompleksne in hermitsko konjugirane matrike, lastni vektorji in lastne vrednosti, linearne transformacije in operatorji, sistemi linearnih enačb, fizikalna uporaba tenzorjev (vztrajnostni moment, dielektrična konstanta, toplotna prevodnost), Jonesove matrike. 4) Navadne diferencialne enačbe Primeri navadnih diferencialnih enačb,, mehanska nihanja (harmonsko nihanje, dušeno nihanje, vsiljeno nihanje, sklopljeno nihanje, majhna nihanja, aharmonska nihanja).	Vectorial and tensorial algebra, determinant, inverse matrices, complex and Hermitian conjugated matrices, eigenvectors, eigenvalues, linear transformations and operators, linear systems of equations, use of tensors in physics (moment of inertia, dielectric constants, heat conductivity), Jones matrices. 4) Ordinary differential equations Examples of ordinary differential equations, mehanic oscillations (harmonic oscillation, damped oscillation, forced oscillation, coupled oscillation, small oscillations, anharmonic oscillations).

- Matematična fizika 1,

Cilji in kompetence:	**Objectives and competences:**
Študentje ponovijo osnovna matematična orodja in principe ter razširijo uporabo na fizikalne probleme. Tvorijo ustrezne matematične modele za fizikalne probleme, formulirajo ustrezne robne pogoje in fizikalno interpretirajo dobljene rezultate.	The students refresh their knowledge about several mathematical tools and expand their application to physical problems. They form appropriate mathematical models for physical problems, formulate boundary conditions and interpret the obtained solutions

Predvideni študijski rezultati:	**Intended learning outcomes:**
Znanje in razumevanje: Kompleksno razumevanje fizikalnih zakonitosti in sposobnost le-te kvantitativno opisati, napovedati in izračunati rezultate.	**Knowledge and understanding:** Complex understanding of physical laws and ability to qualitatively describe them, predict and calculate results.

Prenesljive/ključne spretnosti in drugi atributi: Reševanje fizikalnih in tehničnih problemov z matematičnimi orodji in postopki.	**Transferable/Key Skills and other attributes:** Solution of physical and technical problems using the mathematical tools and methods.

Metode poučevanja in učenja:	**Learning and teaching methods:**
Postavitev problema, izbira potrebnih matematičnih orodij za reševanje, postavitev matematičnega modela, analitično in numerično reševanje. Interpretacija dobljenih rešitev.	Setting up of a physical problem, selection of appropriate mathematical tools, setting up a mathematical model, finding of an analytical or numerical solution. Interpretation of obtained solutions.

Načini ocenjevanja:	Delež (v %) / Weight (in %)	**Assessment:**
Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Type (examination, oral, coursework, project):
Pisni izpit	**40**	Written exam
Ustno izpit	**40**	Oral exam
Seminarska naloga	**20**	Seminar pape
