**Pogoji za vključitev v delo oz. za opravljanje  
študijskih obveznosti:**

**Prerequisites:**

Poznavanje fiziologije rastlin na ravni dodiplomskega študija

Knowledge of physiological plant ecology at graduate level

**Vsebina:**

V predmetu so podrobno obravnavana izbrana poglavja iz vpliva naravnih in antropogenih stresnih dejavnikov na fiziološke procese v rastlini s poudarkom na funkcionalnih motnjah celičnega metabolizma in odzivom rastlin na stresne dejavnike na nivoju celic in celotne rastline.

A) Funkcionalne motnje celičnega metabolizma  
Toksični efekti kisika na rastline, motnje v

**Content (Syllabus outline):**

The lecture focuses on selected chapters on the impact of natural and anthropogenic stress factors on physiological processes in plants with the special emphasis on functional disturbances of cell metabolism and the response of plants to stress factors on the cellular and the whole plant level.

A) Functional disturbances of cell metabolism  
Toxic effects of oxygen on plants, disturbances

metabolizmu ogljika, motnje v mineralni prehrani

B) Odzivi rastlin na stresne dejavnike

Obrambni in reparaturni mehanizmi, detoksifikacija prostih kisikovih radikalov z antioksidanti in encimi; sinteza, kompartimentacija in vloga antioksidantov; aktualna dognanja o vlogi glutationa, askorbinske kisline, tokoferola in karotinoidov v obrambi pred oksidativnim stresom

Posebni poudarek je na predstavitev lastnih raziskav v okviru naslednjih učnih sklopov:

1. Daljinski transport vode v drevesu

(Fiziološko ozadje ksilemskega toka, povezava med ksilemskim tokom, evapotranspiracijo in fotosintezo, principi meritev vodnega statusa rastlin, meritve ksilemskega toka s TDP (thermal dissipation probe, tipalo termičnega odvoda) in HPV (Heatpulse velocity) senzorji, predstavitev rezultatov merjenja ksilemskega toka v smreki po napadu podlubnikov in okužbi z glivo *Ceratocystis polonica*).

2. Vloga metabolizma žvepla v rastlinah in prilagoditvi na abiotski/biotiski stres v kmetijskih ekosistemih

3. Biokemične in strukturne spremembe rastlinskih tkiv kot posledica fizioloških motenj na hortikulturnih rastlinah

Vloga antocianskih vakuolarnih vključkov (AVI, anthocyanic vacuolar inclusions) na barvo cvetov in plodov v povezavi s pomanjkanjem kalcija

Programiranaceličnasmrt v povezavi s fiziološkimimotnami

4. Bioindikacija onesnaževanja okolja

Reakcijski in akumulacijski indikatorji, kazalci in testni organizmi, metode biomonitoringa, vloga glutationa v detoksifikaciji težkih kovin.

5. Termogeneza aroidnih vrst: fiziološko ozadje

in carbon metabolism, disturbances in mineral nutrition

Habitat-related aspects of mineral metabolism;

B) The response of plants to stress factors

Defense and reparatory mechanisms, detoxification of reactive oxygen species with antioxidants and enzymes; synthesis, compartmentation and function of antioxidants; recent advances in the role of glutathione, ascorbate, tocoferol and carotinoids in defense against oxidative stress

Specialempasis is placed on presentation of own research within the following earning packages:

1. Long distance transport

of water in trees (Physiological background of xylem flow, link between xylem flow, evapotranspiration and photosynthesis, principles of sap flow measurement techniques with TDP (thermal dissipation probe) and HPV (Heatpulse velocity) sensors. Presentation of our own results of sap flow measurements in spruce affected by bark beetles and *Ceratocystis polonica* infection).

2. The impact of sulfur metabolism in plants and adaptation to abiotic/biotic stress in agricultural ecosystems

3. Biochemical and structural changes in plant tissues as a result of physiological disorders in horticultural crops

The impact of anthocyanic vacuolar inclusions (AVIs) on the color of flowers and fruits and alterations caused by calcium deficiency

Programmed cell death in relation to the physiological disorders

4. Bioindication of pollution impacts

Response and accumulation indicators, indicators and test organisms, biomonitoring methods, the role of glutathione in

termogeneze (regulacija, vloga alternativne oksidaze, vloga salicilne kisline in etilena, hlapni sekundarni metaboliti) ultrastrukturne posebnosti tkiv spadiksa in površine spate, ekološki aspekt termogeneze, 4 tipi termogeneze (morphological and physiological properties, time course of heating process in different thermogenesis types), presentation of scientific publications and research on the genera *Alocasia*, *Colocasia* and *Arum*, presentation of research results within the international project INEA (International Network for Edible Aroids).

- Inventarizacija, morfološke in biokemijske raziskave bele murve, reintegracija morikulture

the detoxification of heavy metals.  
5. Termogenesis of aroid species: physiological background of thermogenesis (regulation, the role of alternative oxidase, the role of salicylic acid and ethylene, volatile secondary metabolites); ultrastructural characteristics of spadix and the surface of the spathe, ecological aspect of thermogenesis, 4 types of thermogenesis (morphological and physiological characteristics, the time course of heating process in different thermogenesis types), presentation of scientific publications and research on the genera *Alocasia*, *Colocasia* and *Arum*, presentation of research results within the international project INEA (international Network for Edible Aroids).  
- Inventarisation, morphological and biochemical analyses of white mulberry, reintegration of moriculture

**Cilji in kompetence:**

- Posebna pozornost je posvečena izbranim odzivom rastlin na izbrane okoljske dejavnike
- Poznavanje daljinskega transporta vode
- Prepoznavanje izbranih toksičnih efektov kisika
- Poznavanje funkcijskih motenj celičnega metabolizma
- Vpogled v simptome poškodb na nivoju celic in celega organizma
- Obravnavava v izbrane obrambne in reparaturne mehanizme
- Poznavanje pomena termogeneze v biologiji cvetenja
- Obravnavava izbranih analitičnih metod v ekofiziologiji in stresni fiziologiji rastlin

**Objectives and competences:**

- Special attention is paid to the selected responses of plants to stress factors
- Knowledge of water long distance transport
- Illustration of selected toxic effects of oxygen
- selected functional disturbances in cell metabolism
- Knowledge of injury patterns and symptoms on cell and whole plant level
- An insight into the defense and reparatory mechanisms
- Knowledge of the role of thermogenesis in floral biology
- selected analytical measurements in ecophysiology and stress physiology of plants

**Predvideni študijski rezultati:**

Znanje in razumevanje:

- Znanje in razumevanje odziva rastlin na izbrane okoljske dejavnike
- Razumevanje toksičnih efektov kisika
- Poznavanje stresnih faktorjev, prepoznavanje simptomov poškodb in osnovnih obrambnih in reparaturnih mehanizmov
- Osvojitev izbranih metod v ekofiziologiji

Prenesljive/ključne spremnosti in drugi atributi:

- Pridobitev vrhunskega znanja o principih in metodah v ekofiziologiji in stresni fiziologiji rastlin ter uporaba tega v praksi

**Intended learning outcomes:**

Knowledge and Understanding:

- Top-level knowledge and understanding of the response of plants to stress factors
- Top-level understanding of toxic effects of oxygen
- Top-level knowledge of stress factors, identification of injury patterns and symptoms, understanding the basic defense and reparatory mechanisms
- Methods and ecophysiological equipment

Transferable/Key Skills and other attributes:

- Achieving top-level knowledge about the principles and methods in ecophysiology and stress physiology for good practice

**Metode poučevanja in učenja:**

**Learning and teaching methods:**

- Predavanja
- Izbrane fitofiziološke raziskave z uporabo biokemičnih in fizioloških metod v laboratoriju in na terenu s poudarkom na morfologiji in funkciji rastlin pod vplivom okolja
- Samostojno delo

- Lectures
- Selected phytophysiological research using biochemical and physiological methods in laboratory and in field with special attention to environmental impacts to plant morphology and functions
- Independent work

Delež (v %) /

**Načini ocenjevanja:**

Weight (in %)

**Assessment:**

<ul style="list-style-type: none"> <li>• Seminarska naloga in njena predstavitev</li> <li>• Laboratorijski dnevnik</li> <li>• Pisni izpit</li> </ul>	25% 25% 50%	<ul style="list-style-type: none"> <li>• Seminar essay and its defense</li> <li>• Diary of laboratory results</li> <li>• Written exam</li> </ul>
