

Univerza v Mariboru

Fakulteta za naravoslovje
in matematiko

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Fizikalne lastnosti materialov
Course title:	Physical Properties of Materials

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
FIZIKA		1. ali 2.	1., 2. ali 4.
PHYSICS		1. or 2.	1., 2. or 4.

Vrsta predmeta / Course type

Izbirni za vse module

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
15					165	6

Nosilec predmeta / Lecturer:

Zdravko Kutnjak

Jeziki /

Languages:

Predavanja /

Lectures:

Vaje / Tutorial:

slovenski/Slovenian in/and angleški s slovenskim prevodom/English with translation in Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Predznanje iz moderne fizike

Prerequisites:

Basic knowledge of modern physics

Vsebina:

- 1) struktura materialov in interakcije
- 2) Elektroni v kristalih: fermijeva površina, gostota stanj, energijski pasovi, prevodni pas
- 3) Polprevodniki: homogeni, cisti in dopirani, prevodne lastnosti, nehomogeni, p-n stik, p-n-p tranzistor

Content (Syllabus outline):

- 1) Structure of materials: building blocks and interactions,
- 2) Theory of electrons in crystals: free electrons, energy levels/bands, Fermi surface, density of states
- 3) Semiconductors: pure and doped, transport properties, p-n junction, laser diodes, p-n-p transistor,

4) Mrežna nihanja: veriga atomov, optična in akustična veja, fononi, toplotna kapaciteta

5) Mrežni defekti in efekti končnih dimenzij

6) Dielektriki in Feroelektriki: dielektričnost, spontana polarizacija

7) Magnetne lastnosti, diamagneti, paramagneti, feromagneti, magnoni

8) Fazni prehodi: Landauova fenomenološka teorija, naivna teorija povprečnega polja, nekласični primeri, univerzalnostni razredi

9) superprevodniki, osnovne lastnosti, Londonova fenomenološka teorija, Cooperjevi pari, visokotemperaturni superprevodniki

10) Uvod v lastnosti mehke snovi: polimeri, tekoči kristali, koloidi

4) Lattice vibrations: chain of atoms, optical and acoustic branch, phonons, specific heat

5) Defects of crystal lattice and finite-size effects

6) Dielectrics and ferroelectrics: dielectric constant, spontaneous polarization

7) Magnetic properties: diamagnets, paramagnets, ferromagnets, magnons

8) Phase transitions: Landau phenomenological theory, naive mean-field theory, nonclassical examples, universality classes

9) superconductors: basic properties, London theory, Cooper's pairs, high Tc superconductors

10) An introduction to soft matter properties: polymers, Liquid crystals, colloids

Temeljni literatura in viri / Readings:

- 1) *Physics of Materials*, Yves Quere, Gordon and Beach Science Publishers (1998);
- 2) *Introduction to Solid State Physics*, C. Kittel, John Willey, 1986
- 3) *Teorija trdne snovi*, P. Prelovšek, Ljubljana, 1999
- 4) *Solid State Physics*, N.W. Ashcroft, Rinehart & Winston, 1976
- 5) *Molekule, kristali, jedra, delci*, J. Strnad, DZS, 1982 (slovenian)
- 6) M. Klemm, O.D. Lavrentovich, *Soft Matter Physics*, Springer-Verlag, New York, 2003.
- 7) P. M. Chaikin, T. C. Lubensky, *Principles of Condensed Matter Physics*, Cambridge University Press, Cambridge, England, 1995.
- 8) Clanki v Science, Nature, Scientific American.
- 9) *Soft Matter Physics*, M. Daoud, Springer, 1999

Cilji in kompetence:

Izravnalni predmet, ki da določeno predznanje tistim študentom, ki nimajo dovolj predznanja iz fizike kondenzirane materije, tako, da lahko v nadaljnjih semestrih sledijo bolj specializiranim in poglobljenim predmetom.

Objectives and competences:

Introductory course, which purpose is to equalize the knowledge of students. It is suitable for those students who did not acquire enough basic knowledge in condensed matter physics. Acquired knowledge within the course should allow them to be able to follow later more specialized courses.

Predvideni študijski rezultati:

Intended learning outcomes:

<p>Znanje in razumevanje:</p> <p>Razumevanje fizikalnih lastnosti procesov v izbranih snoveh.</p> <p>Prenosljive/ključne spretnosti in drugi atributi:</p> <p>Rešitev problemov z matematičnimi orodji, numeričnimi metodami, univerzalnosti v fiziki in celosten pristop k reševanju problemov.</p>	<p>Knowledge and understanding:</p> <p>Understanding of physical properties in selected materials.</p> <p>Transferable/Key Skills and other attributes:</p> <p>Solving of problems with mathematical tools, numerical methods, universalities in physics and gained global approach on solving a problem.</p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Metode poučevanja in učenja:</p> <p>Metodika obsega predavanja in samostojnega dela v obliki seminarjev, ki podajajo uvod v problematiko in trenutno razumevanja fizikalnih lastnosti materialov.</p>	<p>Learning and teaching methods:</p> <p>Lectures and seminars providing the introduction of current knowledge of physical properties of condensed matter materials</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Type (examination, oral, coursework, project):
Seminar	60%	Seminar
Ustni izpit	40%	Oral exam
