Prerequisites:

Basic understanding of principles of evolution and familiarity with basics of modelling.

Vsebina:

Osnove teorije iger, fizikalna interpretacija Darwinovega zakona evolucije, uspešnost različnih vedenjskih vzorcev v luči fizike.

Content (Syllabus outline):

Basics of game theory, physical interpretation of the Darwinian law of evolution, successfulness of different behavioural patterns in terms of physics.

Cilji in kompetence:

Poglobiti znanje o vedenjskih strategijah in razumeti njihov uspeh (ali neuspeh) na podlagi fizike.

Objectives and competences:

Deepen the knowledge about behavioural patterns and understand their success (or failure), in view of the underlying mechanisms of physics.

Predvideni študijski rezultati:

Znanje in razumevanje:

Poglobljeno razumevanje učinkov in potencialov različnih vedenjskih vzorcev v družbi.

Prenesljive/ključne spretnosti in drugi atributi:

Sposobnost prepoznati in analizirati različne vedenjske vzorce in strategije ter predvideti njihov vpliv na družbo (ali skupino ljudi), ki jim je podvržena.

Intended learning outcomes:

Knowledge and understanding:

A deeper understanding of effect and potentials of different behavioural patterns in society.

Transferable/Key Skills and other attributes:

The ability to recognize and analyse different behavioural patterns and strategies, and foretell their impact on the affected society (or group of people).

Metode poučevanja in učenja:

Predavanja in individualno raziskovalno delo.

Learning and teaching methods:

Lectures individual research work.
