

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Izbrana poglavja iz algebре
Course title:	Topics in Algebra

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Matematika, 3. stopnja		1. ali 2.	1. ali 3. ali 4.
Mathematics, 3 rd Degree		1 st or 2 nd	1 st or 3 rd or 4 th

Vrsta predmeta / Course type	izbirni/elective
-------------------------------------	------------------

Univerzitetna koda predmeta / University course code:

Nosilec predmeta / Lecturer:	Daniel Eremita
-------------------------------------	----------------

Jeziki / Languages:	Predavanja / Lectures: Slovenski in angleški jezik; Slovene and English
	Vaje / Tutorial: Slovenski in angleški jezik; Slovene and English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Poznanje temeljnih algebrskih struktur: grup, modulov, kolobarjev in polj.	Prerequisites: Knowledge of fundamental algebraic structures: groups, modules, rings and fields.
---	---

Vsebina:

Izbrana so posebna poglavja iz teorije grup, teorije kolobarjev in modulov, neasociativne algebri ali katerega drugega modernega algebraičnega področja. Izbira poglavij je odvisna od interesa in raziskovalne usmerjenosti študentov ter trendov v sodobni algebri. Spodaj navedena literatura praviloma služi le kot osnova in je nadgrajena z bolj specializiranimi teksti

Content (Syllabus outline):

Special topics in group theory, ring and module theory, nonassociative algebra or some other area of contemporary algebra are chosen. The choice depends on students' interests and their research orientation, as well as on trends in modern algebra. The literature below in principle serves only as a basis, and is combined with more specialized

Temeljni literatura in viri / Readings:

- W. A. Adkins, S. H. Weintraub, Algebra. An approach via module theory. Springer-Verlag, 1999.
- Y. Bahturin, Basic structures of modern algebra, Kluwer AP, 1991.
- P. M. Cohn, Basic algebra. Groups, rings and fields, Springer-Verlag, 2003.
- P. A. Grillet, Abstract algebra, Springer-Verlag, 2007.
- T. W. Hungerford, Algebra, Springer-Verlag, 1980.
- I. M. Isaacs, Algebra. A graduate course, Brooks/Cole Publishing Company, 1994.
- A. W. Knapp, Basic algebra, Springer-Verlag, 2006.
- S. Lang, Algebra, Springer-Verlag, 2002.

Cilji in kompetence:

- Študentu predstaviti moderno algebraično področje, kar lahko služi kot uvod v raziskovalno delo;
- Doseči poglobljeno razumevanje teoretskih in metodoloških konceptov s področja algebri
- Razviti sposobnost za samostojno reševanje najzahtevnejših problemov iz algebri.
- Zmožnost razvijanja kritične refleksije na področju algebri

Objectives and competences:

- To present a modern algebraic area, which can serve as an introduction to student's research work;
- To achieve a deeper understanding of theoretical and methodological concepts of algebra
- To develop the ability for solving the most challenging problems in algebra.
- Ability to develop critical reflection in algebra

Predvideni študijski rezultati:**Znanje in razumevanje:**

- poglobljeno znanje posebnega algebrskega področja;
- poglobljeno razumevanje nekaterih posebnih algebrskih pojmov.

Prenesljive/ključne spremnosti in drugi atributi:

- podlaga za raziskovalno delo na posebnem področju algebri.

Intended learning outcomes:**Knowledge and understanding:**

- a deeper knowledge of a special algebraic topic;
- a deeper understanding of some special algebraic concepts.

Transferable/Key Skills and other attributes:

- a basis for research in a special algebraic area

Metode poučevanja in učenja:

- predavanja;
- priprava seminarja;
- konzultacije;
- samostojni študij.

Learning and teaching methods:

- lectures;
- seminar work;
- consultations;
- self-study.

Načini ocenjevanja:Delež (v %) /
Weight (in %)**Assessment:**

Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Type (examination, oral, coursework, project):
Seminarsko predavanje	20%	Seminar talk
Domače naloge	30%	Homework
Ustni izpit	50%	Oral examination
