

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Računalniška matematika
Course title:	Computer mathematics

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Matematika, 3. stopnja		1.	2.
Mathematics, 3 rd Degree		1 st	2 nd

Vrsta predmeta / Course type	obvezni ali izbirni/obligatory or elective
------------------------------	--

Univerzitetna koda predmeta / University course code:	
---	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
45					225	9

Nosilec predmeta / Lecturer:	Aleksander Vesel
------------------------------	------------------

Jeziki / Languages:	Predavanja / Lectures: Slovenski in angleški jezik; Slovene and English
	Vaje / Tutorial: Slovenski in angleški jezik; Slovene and English

**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

Poznanje temeljnih konceptov računalniške in diskretne matematike: algoritmov, podatkovnih struktur, kombinatorike, teorije grafov. Poznavanje osnov linearne algebре, teorije števil, matematične logike.

Basic knowledge of fundamental concepts of computer and discrete mathematics: algorithms, data structures, graph theory. Knowledge of basic linear algebra, number theory, mathematical logic.

Vsebina:

Teorija algoritmov: formalizacija algoritma, izražanje algoritma, analiza algoritma.

Teorija avtomatov in jeziki.

Modeli računanja: Turingov stroj, RAM, RASP.

Churchova teza.

Teorija izračunljivosti: odločitveni problemi, odločitveni problemi in jeziki, razredi odločitvenih problemov oziroma hezikov, razreda P in NP, nedeterministični Turingov stroj, NP-polni problemi, odprtva vprašanja.

Nekatere izmed teh tem so obdelane podrobnejše, druge pa le na osnovni ravni. Pri izboru se upoštevajo interesi in raziskovalne usmeritve študentov.

Content (Syllabus outline):

Algorithms: formalization of algorithms, expressing algorithms, algorithm analysis.

Automata theory and languages.

Models of computation: Turing machine, RAM, RASP.

Church's thesis.

Theory of computation: decisions problems, decisions problems and languages, classes of languages/ decisions problems, classes P and NP, nondeterministic Turing machine, NP-complete problems, open questions.

Some of these topics are treated in greater detail, and some of them only at a basic level. The selection depends on students' interests and their research orientation.

Temeljni literatura in viri / Readings:

- M. Sipser, Introduction to the Theory of Computation, Course Technology, 2005.
- M. R. Garey, D. S. Johnson, Computers and Intractability: A Guide to the Theory of NP-Completeness, W. H. Freeman, New York, 1997.
- T.H. Cormen, C.E. Leiserson, R.L. Rivest, Introduction to algorithms, The MIT Press, 2001.
- M.A. Weiss, Data structures and algorithms analysis, The Benjamin/Cummings Publishing Company, 1995.

Cilji in kompetence:

- Doseči poglobljeno razumevanje teoretskih in metodoloških konceptov s področja računalniške matematike
- Razviti sposobnost samostojnega razvijanja novega znanja s področja računalniške matematike
- Razviti sposobnost za samostojno reševanje najzahtevnejših problemov iz računalniške matematike
- Razviti sposobnost izboljševanja znanih in odkrivanja novih rezultatov s področja računalniške matematike
- Zmožnost razvijanja kritične refleksije na področju računalniške matematike
- Razviti zmožnost vodenja najzahtevnejših znanstvenoraziskovalnih projektov s širšega področja računalniške matematike.

Objectives and competences:

- To achieve a deeper understanding of theoretical and methodological concepts of computer mathematics
- To develop the ability to independently develop new knowledge in the field of computer mathematics
- To develop the ability for solving the most challenging problems in computer mathematics
- To develop the ability of improving known results as well as obtaining new results in computer mathematics
- Ability to develop critical reflection in computer mathematics
- To develop the ability to lead the most challenging scientific research projects in the wider field of computer mathematics

Predvideni študijski rezultati:

Znanje in razumevanje:

- poglobljeno razumevanje izbranih področij računalniške matematike;
- poglobljena zmožnost uporabe računalniške matematike na drugih področjih.

Prenesljive/ključne spremnosti in drugi atributi:

- podlaga za raziskovalno delo na področju računalniške matematike;
- pridobljeno znanje za uporabo računalniške matematike na drugih področjih.

Intended learning outcomes:

Knowledge and understanding:

- Deeper understanding of selected areas of computer mathematics;
- Deeper ability to use computer mathematics in other areas.

Transferable/Key Skills and other attributes:

- a basis for research in computer mathematics;
- knowledge needed for applying computer mathematics to other areas.

Metode poučevanja in učenja:

- predavanja;
- priprava seminarja;
- konzultacije;
- samostojni študij.

Learning and teaching methods:

- lectures;
- seminar work;
- consultations;
- self-study.

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Type (examination, oral, coursework, project):
• seminarsko predavanje;	20 %	• seminar talk;
• pisni izdelek;	30 %	• written work;
• ustni izpit.	50 %	• oral examination.
